File Version: 21.03

IBM C2020-701 IBM Cognos TM1 10.1 Analyst

Good explanation provided and the references added most of the questions.

Questions and Answers material is updated in highly outclass manner on regular basis

This VCE covers all syllabus. After preparing it anyone pass the exam in high grades.

This is a new VCE file with new questions. All the questions are super valid.

Exam A

QUESTION 1

When using the suppress zero option in a cube view, data that is in an aggregated or calculated value but still zero will display as what?

- A. Highlighted in blue
- B. Zeros
- C. Hidden
- D. Bold text

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

answer is verified.

QUESTION 2

Which three statements are true regarding TM1 Excel functions? (Choose three.)

- A. The VIEW function creates an optimized view of the cube specified by the cube argument.
- B. The DBR function stands for Database Read.
- C. The value returned by the DBRA function cannot be edited.
- D. ELCOMP returns the name of a child of a consolidated element in a specified dimension
- E. SUBNM returns the element of a dimension subset and allows a double-click to bring up the subset editor.

Correct Answer: ADE

Section: (none)

QUESTION 3

What are three reasons why you would choose an Active Form over other report styles? (Choose three.)

- A. When the user needs to drill down and drill up on rows
- B. When the user needs to drill down and drill up on columns
- C. When the user needs to suppress zeros
- D. When there is a need to dynamically format cells

E. When the user needs to move dimensions around the report

Correct Answer: ACD

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 4

A financial controller wants to create a financial statement report however, the chart of accounts dimension has more aggregations than is required for the report. The controller wants to create a subset that has only the sub account and account elements

How should this be accomplished?

- A. Use the Filter by Attribute function.
- B. Use the Filter by Level function.
- C. Use the Filter by Wildcard function.
- D. Use the Filter by Element function.

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

QUESTION 5

Which three selections are available when filtering a TM1 cube view? (Choose three.)

- A. TopCount
- B. Max
- C. BottomPercent
- D. BottomSum
- E. GreaterThan

Correct Answer: ACD

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 6

A user wants to create a view looking at a particular product called "101 - Chips". They use the "Filter by Wild Card" function to locate the product, but no elements are returned.

Which statement describes what is happening?

- A. The user does not first select the Hierarchy Sort function.
- B. The user does not first select the All function.
- C. The user did not first select the Reload Subset function.
- D. The user should be using Filter by Level function.

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

QUESTION 7

What is the difference between a TM1 Sandbox and a Personal Workspace?

- A. A Personal Workspace allows you to work in a private area where a Sandbox is shared.
- B. A Personal Workspace is a special default unnamed Sandbox where you begin your work.
- C. A Personal Workspace is shared.
- D. A Personal Workspace does not require you to commit your data as a Sandbox does.

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:**QUESTION 8**

When exporting a cube view from TM1 Web, which prerequisite is required to ensure charts are included?

- A. DoJo 1.6
- B. Java Runtime Engine (JRE)

- C. Microsoft Excel
- D. Adobe Acrobat

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

answer is corrected.

QUESTION 9

A user wants to update TM1 data within a Microsoft Excel worksheet. What are the three ways to do this? (Choose three.)

- A. Create an Active Form from within TM1 Cube Viewer.
- B. Create a Snapshot from within TM1 Cube Viewer.
- C. Create a Sandbox from within TM1 Cube Viewer.
- D. Select In-Spreadsheet Browser from within TM1 Perspectives.
- E. Create an Excel Slice from within TM1 Cube Viewer.

Correct Answer: ADE

QUESTION 14

In TM1 Cube Viewer, you are viewing an Income Statement cube containing dimensions for Department, Months, Budget Version, and Account. Currently, the Account dimension is listed in the rows and the Months dimension is listed in the columns. You want to see a comparison of each element in the Budget Version dimension next to each account.

Which feature in TM1 Cube Viewer will accommodate this requirement?

- A. Personal Workspace
- B. Sandbox
- C. Stacking dimensions
- D. Layout Right to Left

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 15

The manufacturing department interacts with IBM CognosTM1 data using TM1 Perspectives. They want to view data by product and location. Products are on the rows of the analysis and plants are on the columns. Products are consolidated into categories and locations are consolidated into regions.

Which two interfaces allow them to expand and collapse on both the rows and columns of the analysis? (Choose two.)

- A. Active Form
- B. Cube Viewer
- C. In-Spreadsheet Browser
- D. Excel Slice

Correct Answer: BC

QUESTION 32

When should you use the DBR formula over the DBRW formula?

- A. When you only want users to read the data
- B. When a cell must be calculated prior to being referenced
- C. When referencing a SUBNM formula
- D. When using Active Forms

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

answer is modified.

QUESTION 33

The human resources department requires a TM1 Web Labor Detail report which shows Total Salary, Benefits, and Taxes for each employee within a selected department. The user should be able to select a department and have the rows of the report display just the employees in that department with the costs across the columns. Employees should be sorted in descending order based on Total Salary. Unfortunately Salary, Benefits, and Taxes are all stored in different cubes and the cubes only share the Employee and Department dimensions.

How should you build the Labor Detail report?

- A. Use three slices, one for each of the source cubes and combine using Excel formulas.
- B. Use one slice with zero suppression for Salary and two snapshots for the other cubes.
- C. Use an Active Form.
- D. Use the In-Spreadsheet Browser.

Correct Answer: C

Section: (none)

QUESTION 35

An international company has an existing TM1 server application they use for planning, forecasting, and reporting. The corporate strategy department wants to share parts of this application with external consultants and partners. They decide to create Cognos Insight workspaces which includes data from this server application combined with additional analysis and content. They intend to distribute a single workspace ".cdd" file to the recipients.

How should they integrate the TM1 server data with additional content resulting in distributable Cognos Insight workspace files?

- A. Connect to the server using Distributed Mode, save the workspace and then modify as needed.
- B. Drag and drop TM1 cube views and subsets into the workspace, save the workspace and then modify as needed.
- C. Connect to the server using Connected Mode, save the workspace and then modify as needed.
- D. Import TM1 cube views and subsets, save the workspace and then modify as needed.

Correct Answer: D

QUESTION 40

Whenever you open the Sales cube you see a hierarchical list of all products. The default view consists of default subsets for all dimensions. You would like to see a list of 10 products you are responsible for by default.

Which three actions would achieve this? (Choose three.)

- A. Create a private default subset for the product dimension and leave the default view unchanged.
- B. Create a private default subset for the product dimension and leave the default view unchanged,
- C. Create a private named subset for the product dimension and create a private named view using it.
- D. Create a private named subset for the product dimension and create a private default view using it.
- E. Create a private default subset for the product dimension and create a private default view using it.

Correct Answer: ADE

Section: (none)

Explanation

Explanation/Reference:**QUESTION 41**

A cube called Salary has two dimensions: Employee and Time. Using cube security, the security group Executive is assigned READ access to the Salary cube. Using element security, the security group Executive is assigned WRITE access to all elements of the Employee dimension.

Using element security, the security group Executive is assigned WRITE access to only 1 element, July, and READ access to all other elements in the Time dimension.

A user of the security group Executive will have which access level when viewing the Salary cube?

- A. WRITE access to July cells only
- B. WRITE access to all cells
- C. READ access to all cells
- D. READ access to July cells only

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:**QUESTION 42**

How do you configure a TM1 Web application so that users are not prompted for the TM1 Admin Host every time they log in?

- A. Modify the capability assignments in TM1 Architect.
- B. Edit the pmpsvc_config.xml file.
- C. Edit the web.config file.
- D. Change security on the top-Level application folder from "private" to "public".

In the cube shown in the exhibit, you need to show only the five most expensive products. The list should change dynamically with the selection of the budget version.

How would you achieve this?

- A. Create a filtered subset for products with the option TopSum.
- B. Create a view filter with the option TopSum.
- C. Create a filtered subset for products with the option TopCount,
- D. Create a view filter with the option TopCount.

Correct Answer: D

Section: (none)
