Exam A**QUESTION 1**

The Health Indicator component displays details regarding the Health Indicators that are used to calculate and set the current status of a selected CI. Each Health Indicator's status and value are displayed. What are the categories into which Health Indicators displayed by the component are grouped?

- A. Health Indicators that are impacted by KPIs and Health Indicators that are not impacted by any KPI calculation
- B. Health Indicators that are used to calculate KPIs and Health Indicators that are not used in any KPI calculation
- C. Health Indicators that are used to calculate CIs and Health Indicators that are not used in any CI calculation
- D. Health Indicators that are used to calculate internal KPIs and Health Indicators that are used to calculate external KPIs

Correct Answer: B

Section: (none)
