QUESTION 31

What is the aim of staffing profiles?

- A. Staffing profiles are used by resources to communicate the projects they are working on and what is the expected effort. Resource managers can use this information to track over- and under-allocated resources.
- B. Staffing profiles allow a manager to plan the future allocation of resources, broken down by role. This lets the business see which kinds of resources and roles they will need for future work.
- C. Project managers use staffing profiles to let resources allocate effort on their projects by means of the Time Management module. This lets financial managers track project costs.
- D. Resources can publish a staffing profile to inform the management about their skills and preferred roles. This allows resource managers to make better decisions when assigning resources to projects.
