5user any svc-http-proxy2 dst-nat 8088

6user any svc-http-proxy3 dst-nat 8088

Based on the above output from an Aruba controller, an unauthenticated user assigned to the logon role attempts to start an http session to IP address 172.16.43.170.

What will happen?

- A. the user's traffic will be passed to the IP address because of the policy statement:user any svc-http dst-nat 8080
- B. the user's traffic will be passed to the IP address because of the policy statement:user any svc-https dst-nat 8081
- C. the user's traffic will be passed to the IP address because of the policy statement:user any svc-http-proxy1 dst-nat SOBS
- D. the user will not reach the IP address because of the policy statement:user any svc-http dst-nat 8080

A user sends a frame with the following attributes:

Source IP: 10 1.1.1 Destination IP: 10 2.2.2 Destination Port: 25

Based on the above Mobility Controller configuration file segment, what will this policy do with the user frame?

- A. The frame is discarded because of the implicit deny all at the end of the policy.
- B. The frame is discarded because of the statement:user host 10.1.1.1 host 10.2.2.2 deny.
- C. The frame is accepted because of the statement:user any any permit.
