### QUESTION 69

Examine the exhibit; then answer the question below.

The Vancouver FortiGate initially had the following information in its routing table:

S 172.20.0.0/16 [10/0] via 172.21.1.2, port2  
 C 172.21.0.0/16 is directly connected, port2  
 C 172.11.11.0/24 is directly connected, port1

Afterwards, the following static route was added:

```
config router static
edit 6
set dst 172.20.1.0 255.255.255.0
set priority 0
set device port1
set gateway 172.11.12.1
next
end
```

Since this change, the new static route is NOT showing up in the routing table. Given the information provided, which of the following describes the cause of this problem?

- A. The subnet 172.20.1.0/24 is overlapped with the subnet of one static route that is already in the routing table (172.20.0.0/16), so, we need to enable allowsubnet-overlap first.
- B. The 'gateway' IP address is NOT in the same subnet as the IP address of port1.
- C. The priority is 0, which means that the route will remain inactive.
