C2040-986

Creating IBM Lotus Notes and Domino 8.5 Applications with XPages and Advanced Techniques

Version 1.0

Exam A

QUESTION 1

What best describes a theme for an XPage application?

A. A theme is a collection of JavaScript resource files that are used to implement the user interface.
B. All of the above can be included in themes.
C. A theme is a collection of Dojo modules that are used for the XPages application.
D. A theme is a collection of CSS files.

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 2 Linda would like to have a navigator pane for her
XPages application.

What would be the best way to implement this pane?

A. She has to build the navigator by using a Notes view with documents defining each link in her navigator. She then integrates that view in each XPage that her application needs.
B. She puts the links for her navigation together by building a custom control and can use that for every page that she needs.
C. She downloads and installs a JavaScript library for a menu.
D. Unfortunately, there is no simple way to do it. so she has to build it on every XPage.

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 3
Barney imports a WSDL file into a LotusScript script library, which generates code to call the Web service methods defined by the WSDL file.

Where can he use this script library?

A. Anywhere that LotusScript can be used
B. Only in agents
C. Only in agents and form or view actions
D. Only in agents that run on the server

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 4
Nancy is creating a Web application and she needs anonymous users to be able to read content and create certain documents.

What does Nancy need to do?

A. Nancy needs to create an Anonymous entry to the ACL with access set to Author. Then, using @Formula she needs to validate if a document is being created by an Anonymous user.

B. Nancy needs to create an Anonymous entry to the ACL with access set to reader and the option "Write public documents". She also needs to make the forms Available to Public Access users.
C. Anonymous must be set to Author in the ACL and forms must be blocked to Anonymous users.
D. Anonymous users cannot create documents if the ACL is set to Reader.

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 5 Joy wants to implement single sign-on for her Lotus Domino
Web applications.

What does she need to do?

A. Ensure that all servers are using the same certificate authority.
B. Enable "use Single Sign-on" in the database properties.
C. Encode the Single Sign-On form in each database.
D. Update the "Session authentication" field in the server's configuration document.

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 6
Marge wants to track user preference information while users navigate through her Web site, but does not want to require users to authenticate when accessing the site.

Which of the following should she use to track the user information?

A. The users must authenticate
B. Servlets
C. User profile documents
D. Cookies

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 7 Adele would like to include a style sheet in every page of
her application.

What should she do to accomplish this?

A. Create a theme and define the style resource within the theme.
B. Create a style resource and reference it in each design element.
C. Create a theme defining the style resource and turn on the Enable Enhanced HTML Application options in the application properties.
D. Use the Enable Enhanced HTML Application option in the application properties, and select her style sheet as the Default Style Sheet Application property.

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:

QUESTION 8
Monique's laptop was stolen. Monique had locally encrypted the databases on her machine using medium encryption.

Which one of the following can unauthorized users do?

A. Compact the databases
B. Nothing
C. Read copies of the databases made through the operating system
D. Use their user ids to access local databases on Monique's workstation

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 9
When enabling his XPages application for mobile access, which best describes the options Enrique should consider?

A. XPages can be viewed without any additional changes on an iPhone or other iOS device.
B. It might be appropriate to include only a subset of functionality because of the different screen size.
C. The screen size means different navigation might be required.
D. All of the above.

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 10
Juanes needs to import some data from a custom application not using a standard database engine, which is being migrated to a Lotus Notes/Domino application.

How can he accomplish this task?

A. Export the data to XML on the old application and import it using XMLT.
B. Use Lotus Enterprise Integrator.
C. Import data using one of the built-in collection services like DECS or connectors.
D. Export the data from the old application to one or more ASCII files and import them by using LotusScript file access methods.

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 11
Winnie is enhancing the interface on the Corporate Phone Book Web application. Ted, the graphics designer who is providing Winnie with the images for her Domino application, as suggested that she use image resource sets.

What is a feature that Winnie can incorporate by using image resource sets?

A. A horizontal image set can be used to add effects when a user hovers the mouse over an image. For example, the normal image could be replaced with an image with different coloring when the mouse hovers over it.
B. A vertical image set can be used to incorporate effects using the onmouseover, onmouseout, and onclick events of an image on an XPage.
C. A vertical image set can be used to incorporate effects using the Normal, Mouse-over, Selected, and Mouse-down image states of a Domino Web page image.

D. A horizontal image set can be used to add effects when a user hovers the mouse over an image. For example, the normal image could be replaced with a larger image when the mouse hovers over it.

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 12
Sonia has been asked to rewrite her company's "Careers" Domino Web site using XPages. One of the benefits expected from the new development is better response time for the users.

What is one reason why XPages may offer better performance versus earlier Domino Web sites?

A. XPages avoid formula language, thereby saving the time incurred by the formula parser on the server.
B. XPages are based on JSPs, which are faster than Domino HTML rendering.
C. The custom controls that ship with XPages provide optimized widgets that may perform better than those developers could produce on their own.
D. XPages are AJAX-enabled, which can offer response time improvements due to partial page refreshes.

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 13
David migrates an XPage application from his development environment to his test server. When he tests the application, his browser returns the HTTP 403 error message.

What is the most probable cause?

A. He is opening the application in the Lotus Notes client. XPages applications can only be viewed on the web.
B. The application is signed with a development ID. It needs resigning with an ID trusted to run XPages on the test server.
C. The test server is not running the HTTP task.
D. He was developing using Firefox but is now looking at the application in Internet Explorer.

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 14 What is the purpose of using XSLT in a Lotus Domino
Web application?

A. To define what DLX should be available for export.
B. To allow a Web service to interact with a Java agent.
C. To display a view as HTML without using a Java applet.
D. To transform XML documents to HTML or even to another XML document.

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 15 Which of the following statements describes the
function of SSL?

A. SSL encrypts the transmission of HTTP by using a registered certificate as an encryption key.
B. SSL encrypts the database by creating a certificate authority as a key ring.
C. SSL encrypts the database ahead of transmission by using a SOCKS proxy.
D. SSL encrypts the transmission of HTTP by using the user's ID as an encryption key

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 16 Arthur has created an XPage to display a list of available meeting rooms. When Arthur views the XPage in a browser, he sees the message Error 403 HTTP Web Server: You are forbidden to perform this operation.

What does Arthur need to do to view the XPage?

A. Make sure that Arthur has the access level in the access level in the access control list that is set to Designer.
B. Make sure that Arthur has the access level in the access level in the access control list that is set to Manager.
C. make sure that Arthur is listed in the Sign agents or XPages to run on behalf of the invoker field in the Web Server > Programmability Restrictions section of the server record.
D. Make sure that Arthur is listed in the Sign agents or XPages to run on behalf of the invoker field in the Security > Programmability Restrictions section of the server record.

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 17 What best describes simple
Actions for XPages?

A. Simple actions are preprogrammed functionalities that can be selected to be executed on an event within a control or within the XPage.
B. Simple actions are predefined shoppers of program code that you can define in the code section of an application.
C. XPages does not support simple actions. Instead, you have the possibility to define custom controls, which provide the same functionality as the simple Actions that you now from elsewhere in Lotus Domino Designer.
D. Simple actions make it possible to do web application programming by dragging and dropping.

Correct Answer: A

Explanation

Explanation/Reference:

QUESTION 18
Mary is posting a discussion database on the Web. She would like to give general users Author access to the database, as long as they identify themselves and have registered with her site.

Which one of the following should Mary do to ensure that all users accessing her database are identified and have Author access?

A. Set the database ACL Default entry to Author and set the Anonymous to No Access. B.
Create an Authors field on her forms and set it to Anonymous
C. Set the database ACL Default entry to No Access and set the Anonymous to Author.
D. Set the form security property, "Who can create documents with this form", to only allow users in the Author role.

A

Correct Answer:

Explanation/Reference:
QUESTION 19
Marta must implement a new application for a library. People have asked to use the application from both the Lotus Notes client and a web browser. Asking developers to best implement these requirements, she got different design answers.

Each of the following statements is true about XPages, except which one?

A. XPages can be to implement both user interfaces at once.
B. Custom controls cannot be used for web and Lotus Notes at the same time.
C. When implementing the application with XPages, they are built without using framesets.
D. With forms, people are often using different forms for web and Lotus Notes.

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 20 XPages are Ajax-enabled. Which option best describes what that
statement means?

A. With Ajax, XPages can be partially refreshed instead of reloaded completely for each change.
B. Ajax allows for lazy loading of content and code.
C. With Ajax, XPages can provide type-ahead.
D. All of the above.

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 21
DJ is developing his first Lotus Domino application. He wants to show a particular set of data to unauthenticated users and provide additional data to authenticated users.

Which of the following can DJ use to determine whether the user is authenticated or not?

A. @IsAuthenticated to determine if the user is authenticated or not
B. @WebUserName, which returns an empty string ("") when a user is not authenticated
C. @UserName, which returns 'Anonymous" for unauthenticated users
D. @WebName to get the current user's name

Correct Answer: C

Explanation

Explanation/Reference:

QUESTION 23
Josh needs to associate the Price and ProductName fields of the Sales database with fields from the Inventory table in a relational database. His company uses DECS. He has created a Data Connection Resource to handle the connection to the Inventory table.

What is the next step to make this connection available to fields on the Product form?

A. From the Advanced tab of the ACL, select "Allow connection to external databases using DCRs". From the Security tab of the Form Properties dialog, click Browse by the Data Source Options and select the DCR.
B. From the Advanced tab of the Database Properties, select "Allow connection to external databases using DCRs". From the Defaults tab of the product form properties dialog, click Browse by the Data Source Options and select the DCR.
C. From the Advanced tab of the Database Properties, select "Allow connection to external databases using DCRs". From the Data Connection Resource Properties, click the Product form under "Connection enabled for".
D. From the Basics tab of the Database Properties, select "Allow connection to external databases using DCRs". From the Defaults tab of the Form Properties dialog, click Browse by the Data Source Options and select the DCR.

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 24
To approve an expense report, Quy goes to a controlled-access section and marks the Status field "Approved". Status is a sign-enabled field.

When is the signature attached?

A. Immediately
B. When the document is mailed
C. When the document is saved
D. When the document is encrypted

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:

QUESTION 25 Joanne is working with two other developers on a company-wide intranet project built in XPages. Each developer has taken responsibility for different aspects of the site, but some of these tasks occur in multiple places within the intranet.

How should they manage these tasks?

A. Create subforms within the XPages to separate and reuse the code.
B. Create custom controls for each aspect of the site that is repeated in multiple places.
C. Create separate XPages for each primary area, then use the Source tab of the Editor view to copy the XML representing each subset of functionality and paste it onto the necessary XPages.
D. Create sections on each XPage to incorporate the shared functionality.

              B
QUESTION 26 An XPage application is mostly made up of the following elements:

A. Forms, views, subforms, pages, framesets, and agents
B. XPages only

Correct Answer:

Section: (none)
Explanation

Explanation/Reference:
C. Forms, views, XPages, CSS and themes, and outlines
D. Forms, views, XPages, custom controls, and CSS and themes

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 27 Which option best describes the benefits of being
Ajax-enabled?

A. Content and code can be loaded when required, rather than when the page is initially displayed.
B. You do not need to use agents to interact with the server dynamically.
C. Ajax functionality can be implemented with much less coding than a traditional Lotus Domino web application.
D. All of the above.

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 28 Jim is looking at the Properties dialog
box for an agent.

Which one of the following best describes the use of the "Allow user activation" option?

A. Allows users with Editor access or above in the ACL to enable an agent
B. Allows users with Editor access or above in the ACL to run an agent
C. Allows users with Author access or above in the ACL to run an agent
D. Allows users with Author access or above in the ACL to enable an agent

Correct Answer: A

Explanation

Explanation/Reference:

QUESTION 29 Yolanda has built the XPages for the sales application. The functionality is working properly, and it is now time to apply the corporate branding. Yolanda has read that XPages can use themes and CSS for affecting the appearance of the UI.

What is a distinction between themes and CSS?

A. CSS is used to control the presentation of data – such properties as color, font, and positioning. Themes cannot manage the same items as CSS, but themes can be used to control functional properties such as the number of displayedview rows.
B. Themes are set the server level to control one, many, or all XML properties of all XPages running on the server. One must use CSS to customize the UI of specific applications.
C. Themes and CSS each can control all of the same items. The difference is that themes can be used to apply to some or all applications on a server, while CSS is application-specific.
D. Themes can be used to control any XML properties of any XPages running on the server, including CSS style properties. Themes are different from style sheets in that they are not restricted to CSS styles.

QUESTION 31
Dudley is looking to improve the performance on an XPages application he built for the marketing department. This application is not used by a large amount of users at one time.

Which server page persistence setting would work best in this scenario?

A. Keep only the current page on disk
B. Server default
C. Keep pages in memory
D. Keep pages on dick

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:

QUESTION 32 Emily is preparing to build an application for using browsers. She is considering
using XPages.

Which of the following statements about XPages is not valid?

A. XPages can be deployed to a Lotus Domino 8 server.
B. XPages can create and manipulate Lotus Domino data on other servers, provided they are within they are within the same trusted domain.
C. XPages can be used on a variety of browsers with minimal changes.
D. XPages can be made multilingual by using built-in Lotus Domino Designer functionality.

A
QUESTION 33
Sarah needs to hide an input control that holds temporary data and access its value with client side JavaScript.

How can she accomplish that task?

A. She deactivates the visible property of the control, then the control itself is not visible, but she can access it with JavaScript.
B. She sets the loaded property of the input control to false, then the control itself is not visible, but she can access it with JavaScript.
C. She goes into the source code and precedes the code for the input control with "//".
D. She has to surround the input control with a <div> section and set the display attribute to none.

QUESTION 40
Monica has bound the view named "Open invoices" into her XPages application, which is accessible as view1. For the convenience of the user, she likes to display the total amount of all invoices.

How can she calculate this amount?

A. var total:dpuble = 0;var doc:NotesDocument =
     view1.getFirstDocument();
     While(doc != null)
     {
     total = doc.getItemValueDouble('amount') + total; var
     tmpdoc:NotesDocument = view1.getNextDocument();
     doc.recycle();
     doc = tmpdoc
     }
B. var allDocs = view1.AllDocuments();var total =
     allDocs.AddValues('amount'); C. var total:double = 0;
     var doc:NotesDocument = view1.getFirstDocument();
     var item:NotesItem; while(doc ! = null){
     item = doc.getFirstItem('amount');
     total = item + total;
     var tmpdoc:NotesDocument = view1.getNextDocument();
     doc.recycle();
     doc = tmpdoc
     }
D. var total = view1.getSumDouble)'amount');

QUESTION 52
Anna, who has developed traditional Lotus Notes application for years, is working on her first XPage application. Until now, she always tried to achieve goals by using as much @formulas as possible. Now she is asking her colleagues about @formulas with XPages.
Which of the following answers is wrong?

A. Thomas said that there is no @formula language with XPages.
B. Marc explained that she can use most of the @formulas within JavaScript.
C. Pete said that she can use @formulas, but because it is running inside JavaScript, @formulas are case sensitive, and instead of semicolons it uses commas to separate parameters.
D. Adam told her that she can use @formulas, but some of them have different functionality.

Correct Answer: A

QUESTION 55 Manesh is developing the ActivityPlanner XPage. He now needs to add check boxes that allow users to select one or more of the activities of "Monthly Volunteering," "New Hire Orientation," and "Quality Circle."

How can Manesh create the check boxes?

A. From the Controls palette, drag "Other" onto the XPage and select Other Controls > Checkbox group. Open the Source tab, and within the xp:checkBoxGroup tag, enter these lines: <xp:selectItem itemLabel="Monthly Volunteering"itemValue="01"></xp:selectItem>
<xp:selectItem itemLabel="New Hire Orientation"
itemValue="02"></xp:selectItem>   <xp:selectItem
itemLabel="Quality   Circle"
itemValue="03"></xp:selectItem>
B. From the Controls palette, drag "Check Box" onto the XPage canvas. open the Source tab, and within the xp:checkBox tag, enter these lines:<xp:selectItem itemLabel="Monthly Volunteering" itemValue="01"></xp:selectItem>
<xp:selectitem itemLabel="New Hire Orientation"
itemValue="02"></xp:selectItem> <xp:selectItem
itemLabel="Quality Circle" itemValue="03"></xp:selectItem>
C. Create a Check box group control on the XPage canvas. In the Options area of the Properties tab, enter the following values on separate lines:Monthly Volunteering
New Hire Orientation

Quality Circle
D. Drag a Check Box control onto the XPage canvas. In the Options area of the Properties tab, enter the following values lines:Monthly Volunteering
New Hire Orientation
Quality Circle

QUESTION 64
Mike developed a billing application that should be used with the browser and with XPages. He tested his application locally until it was finished and ready to be deployed to the server. After installing the application on the server, Mike is testing the application again. But he is not able to even invoke the application. In the browser, he gets the message Error 403, HTTP Web Server. You are forbidden to perform this operation.

What could be the reason for this error message?

A. Because the application is signed with Mike's user name and his name does not show in the following entry in the Lotus Domino Server document: On the Security tab, inside the Programmability Restriction section the field labeled: Signagents or XPages to run on behalf of the invoker. The application needs to be signed with an ID that has rights to run agents or XPages on the server.
B. Mike needs to wait about an hour after deploying the application to the server until the server has cleared all access rights.
C. Mike needs to open the application properties and click the Server tab. In the security section, he needs to enter the name of the server into the Administration Server field on the same tab.
D. An administrator must check and unlock Mike's application first.

QUESTION 103
Melissa is modifying her Lotus Notes application to use XPages and wants to reuse the forms that they have already, because there are lots of validations done on the fields.

How can she use the existing form logic in the XPage?

A. Using the Run Form Validation options, she can set all of the form logic to be triggered operations for on document load, on document save, or both.
B. There is no need t worry because the form logic that is already in the form is automatically used anyway, because the XPage is bound to the form.
C. Using the Run Form Validation options, she can set all of the form logic to be triggered operations for on document load or on document save only.
D. There is no way to reuse that form logic that is already in the form, so it must all be rewritten into the XPage.

Correct Answer: A

QUESTION 104 Maya is considering migrating her existing car rental
application to use XPages.

Which of the following sentences is true?

A. If the existing application is using subforms, the migration is easy: Subforms can be included into XPages without adaptation.
B. Framesets do not need any rework when migrated to XPages.
C. Migrating an existing application is hard work, because it is not possible to run an application to run an application that uses XPages and classical design at the same time.
D. One can use views in XPages. They can be embedded into XPages by using appropriate controls.

QUESTION 105
Mike developed a billing application that should be used with the browser and with XPages. He tested his application locally until it was finished and ready to be deployed to the server. After installing the application on the server, Mike is testing the application again. But he is not able to even invoke the application. In the browser, he gets the message Error 403, HTTP Web Server. You are forbidden to perform this operation.

What could be the reason for this error message?

A. An administrator must check and unlock Mike's application first.
B. Mike needs to open the application properties and click the Server tab. In the Security section, he needs to activate the Application is allowed to run in server option. In addition, he needs to enter the name of the server into theAdministration Server field on the same tab.
C. Mike needs to wait about an hour after deploying the application to the server until the server has cleared all access rights.
D. Because the application is signed with Mike's user name and his name does not show in the following entry in the Lotus Domino Server document: On the Security tab, inside the Programmability restriction section the field labeled: Signagents or XPages to run on behalf of the invoker. The application needs to be signed with an ID that has rights to run agents or XPages on the server.

QUESTION 114
In his XPage stock application, Michael needs the ability, to view and update the properties of goods at several places within the application. Hence, he has developed a custom control for viewing or editing items. Now he wants to select the users that are allowed to change the entries.

How can he achieve this task?

A. To get that functionality, Michael has to define a second custom control, which encapsulates just the access functionality. Then, he has to group together both custom controls and put this group into the main XPage.
B. Michael can define the groups or people with different access with the ACL that is associated with a custom control.

C. With XPages, there is no specific access control functionality. Michael has to use the Application ACL to control access.

D. With custom controls, access is not controllable individually. Michael has to do it at the XPages level.
