C2040-985

Developing IBM Lotus Notes and Domino 8.5 Applications

## Exam A

### QUESTION 1

Which one of the following contains data types stored as summary data by default?

- A. All data types are stored in the summary buffer
- B. Rich text, file attachments, embedded OLE objects
- C. Text, text lists, rich text
- D. Text, number, date/time, reader names

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

**QUESTION 2** Mike is upgrading a Web application to use a different CSS stylesheet for different types of browsers.

Which of the following @functions should he used to determine which Web browser the user is accessing his application with?

- A. @BrowserType
- B. @ClientInfo
- C. @BrowserInfo
- D. @Browser

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

**QUESTION 3** Jarrod wrote an agent that begins with the following LotusScript code:

```
Dim session As New NotesSession Dim db As NotesDatabase Dim view As NotesView Dim doc As NotesDocument Set db = session.CurrentDatabase Set view = db.GetView( "By Category" ) Set doc = view.GetDocumentByKey( "kitten" )
```

When the agent runs, which document will be referenced by the "doc" variable?

- A. If the database is full-text indexed, the first document in the By Category view that contains the word "kitten" in any field. If the database is not full-text indexed, the "doc" variable will be empty.
- B. The first document in the By Category view that has a value of "kitten" in the first sorted column
- C. The first document in the By Category view that contains the word "kitten" in any field
- D. The first document in the By Category view that has any value in the column with an alias of "kitten"

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

### QUESTION 4

Menno has hidden the design of a database and finds out later that most of the design elements have the "prohibit design refresh or replace to modify this element" flag set.

How can he undo this?

- A. He cannot; hidden design is hidden forever.
- B. He can simply replace the design with a blank template, and then replace again with the corrected template.
- C. He needs to go into the design and untag each and every element manually, and then simply replace the design with the updated (new) template once more to update with the last changed.
- D. He needs to create an agent that uses the LotusScript Design classes to remove every design element in the database , and afterward use the corrected template to replace the whole design once more.

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### QUESTION 5

Clifford has a Readers field in his Expense Report form. Who will be able to see the document once he saves it in the application?

- A. Only those people listed in the Readers field.
- B. Anyone listed as a Reader or above in the Access Control List who is also listed in the Readers field.
- C. Anyone listed as a Reader or above in the Access Control List.
- D. Only those people listed in the Execution List or the Access Control List.

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### QUESTION 6

A Text field on a Form is set to "Allow multiple values". Jan is designing the form, and wants to set the default value of the field to a text list of "Apple", "Orange", and "Grape".

What Default field value formula should she use?

- A. "Apple", "Orange", "Grape"
- B. "Apple": "Orange": "Grape"
- C. "Apple" + "Orange" + "Grape"
- D. @TextToList("Apple"; "Orange"; "Grape")

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### QUESTION 7

A button on a Notes document has the following

LotusScript code:

```
Dim workspace As New NotesUIWorkspace Dim uidoc As NotesUIDocument Set uidoc = workspace.CurrentDocument Call uidoc.GotoField("Status") Print "Approved" Where
```

will the word "Approved" appear after the button is clicked?

- A. In the server's log.nsf file
- B. On the status bar
- C. In the "Status" field of the current document
- D. In a messagebox

**Correct Answer:** B

**Section:** (none)

**Explanation****Explanation/Reference:**

**QUESTION 8** Kelsey has a LotusScript agent that uses a dialog box to gather information from the user.

How should he modify this agent for use on the Web?

- A. Use a Domino form to capture the information, modify the LotusScript agent to process these fields, and call the agent from the WebQuerySave event.
- B. Use the LotusScript Evaluate function to call the @WebDialogBox finction.
- C. Rewrite the agent as a JavaScript agent. Use window.prompt to capture the information from the user.
- D. Change the code to @Functions and use the @WebDialogBox function.

**Correct Answer:** A

**Section:** (none)

**Explanation****Explanation/Reference:**

**QUESTION 9** Maria wants to populate a list with the values "Alpha", "Beta", and "Gamma".

What syntax should she use in the formula?

- A. "Alpha", "Beta", "Gamma"
- B. "Alpha"; "Beta"; "Gamma"
- C. "Alpha": "Beta": "Gamma"
- D. "Alpha" & "Beta" & "Gamma"

**Correct Answer:** C

**Section:** (none)

**Explanation****Explanation/Reference:****QUESTION 10**

Erica is writing a formula to determine the number of elements in a list. She wants to ensure that a nonzero positive value is returned, even if the value her @Function is evaluating turns out to be a null string.

Which one of the following can she do to accomplish this?

- A. Use a default formula of 1
- B. Use @Elements and add 1 to the total
- C. Use the @Count function instead of @Elements
- D. Use @Elements([PosInteger]) to ensure that the desired format is returned

**Correct Answer:** C

**Section:** (none)

**Explanation****Explanation/Reference:****QUESTION 11**

Jamie needs to add a RestrictAccess field on a form in the Purchasing application. Only users with the [Admin] role should be able to see this field.

How should she write the hide/when formula to hide this field?

- A. @Elements("[Admin]";@UserRoles)
- B. @IsNotMember("[Admin]";@UserRoles)
- C. @IsContained("[Admin]";@UserRoles)
- D. @Show("[Admin]";@UserRoles)

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

**QUESTION 12** Magdalena wants to allow the users of her application to rearrange and change the settings for some views (including private views), to allow them to optimize their experience in the application.

How does she best do this?

- A. Select the "Create Personal view/folders" option in the ACL, Select the "Allow customizations" option in the Database properties and the "Default design for new folders and views" option in the View properties.
- B. Unselect the "Create Personal view/folders" option in the ACL. Select the "Allow customizations" and "Resizable" options in the View properties.
- C. Select the "Allow customizations" and "Default design for new folders and views" options in the View properties.
- D. Select the "Allow customizations" option in the View properties and select the "Save User settings" option in the Column properties.

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

**QUESTION 13** What function does the Formula type field perform?

- A. It allows documents of interest to be served via subscriptions in the Headlines database.
- B. It allows multiple values in a field to be validated against a defined @Formula statement.
- C. It allows documents to precompute specific values based on user input.
- D. It allows @Formula statements to be entered in a document without executing.

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

**QUESTION 14**

Sam wants to display a column only if the current user is associated with the Manager role. Otherwise, the column should be hidden.

Which one of the following will allow him to do this?

- A. Use @IsNotMember("[Manager]"; @UserRoles) in the hide-when view column formula.
- B. Use @IsNotMember("[Manager]"; @UserRoles) in the hide-when field formula.
- C. Use @IsMember("[Manager]"; @UserRoles) in the hide-when view column formula.
- D. Use @IsMember("[Manager]"; @UserRoles) in the hide-when field formula.

**Correct Answer:** A

**Section:** (none)

**Explanation****Explanation/Reference:****QUESTION 15**

Hermes wants to program a button to allow a user to modify the Status field to a value of "Approved" on the document that they are currently editing in the Lotus Notes client.

Which of the following fragments of LotusScript code will do that?

- A. Dim workspace As New NotesUIWorkspace Dim uidoc As NotesUIDocument Set uidoc = workspace.CurrentDocument Call uidoc.FieldSetText("Status", "Approved")
- B. Dim workspace As New NotesUIWorkspace Dim uidoc As NotesUIDocument Set uidoc = workspace.CurrentDocument uidoc.Statuc = "Approved"
- C. Dim workspace As New NotesUIWorkspace Dim field As NotesUIField Set field = workspace.GetField("Status") Call field.SetText( "Approved" )D. Dim workspace As New NotesUIWorkspace Dim doc As NotesDocument Set doc = workspace.CurrentDocument doc.Status = "Approved"

**Correct Answer:** A

**Section:** (none)

**Explanation****Explanation/Reference:**

**QUESTION 16** Roger wants a JavaScript function to execute in the onLoad event for a form.

What must he select to have it run for both Web and Lotus Notes clients?

- A. Select the form property "Render JavaScript in Notes and Web."
- B. Select "Available Everywhere" in the onLoad event.
- C. Paste the code into the Lotus Notes onLoad event and the Web onLoad event.
- D. Select "Common JavaScript" in the onLoad event.

**Correct Answer:** D

**Section:** (none)

**Explanation****Explanation/Reference:****QUESTION 17**

Mahesh must ensure that only users with the DbAdmin role can edit the Price field on the Product form. The other fields on the form are editable by all users.

How can Mahesh restrict who can edit the Price field?

- A. From the Security tab of the Field Properties, select the [DbAdmin] role in the Edit Enabled option.
- B. Place the Price field in a computed subform.
- C. Add an Input Enabled formula to the Price field. Use the formula: @IsMember["DbAdmin"]; @UserRoles)
- D. Add a computed Authors field to the Product form. For the field value, specify @If(@ThisName="Price"; "[DbAdmin]"; "")

**Correct Answer:** C

**Section:** (none)

**Explanation****Explanation/Reference:****QUESTION 18**

Jim is designing a new application that will be deployed to multiple sites using database replicas.

Which one of the following will he be able to replicate?

- A. Database launch properties
- B. Database file names
- C. View indexes
- D. Full Text indexes

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### QUESTION 19

Therese wants to write some LotusScript code that steps through every document in a view and displays the "Title" field. She currently has the following code written:

```
Dim session As New NotesSession Dim db As NotesDatabase Dim view As NotesView Dim doc As NotesDocument Set db = session.CurrentDatabase Set view = db.GetView( "By Category") Set doc = view.GetFirstDocument Do Until (doc Is Nothing) Print doc.Title(0) ** MISSING CODE ** Loop
```

What does she need to add on the \*\* MISSING CODE \*\* line to make the code work properly?

- A. Set doc = view.GetNextDocument()
- B. Set doc = view.GetNextDocument(doc)
- C. Nothing. The code will work properly as-is.
- D. Call view.GetNextDocument()

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### QUESTION 20

Erin has created a categorized view in her Human Resources database that supports unread marks. When users access the view and try to expand some categories, no documents appear even though the users see unread marks beside the category.

Which one of the following could be the problem?

- A. The documents include Reader names fields.
- B. The database needs to be replicated.
- C. The missing documents in the category have been soft deleted from the database.
- D. The view has an old index and must be reindexed.

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### QUESTION 21

Danielle is updating the "companyName" field on all documents in a view. The field may include varying text, but the field always includes the text "Blue Corporation". For example, one of the documents has "Blue Corporation, a whollyowned subsidiary of GigantaCorp" as the contents of the companyName field.

What formula can Danielle include in her agent to change the "Blue Corporation" text in each companyName field to now be "Green Enterprises".

- A. FIELD companyName := @Set(@Middle(companyName; "Blue Corporation"); "Green Enterprises")
- B. FIELD companyName := @SetString(companyName; "Blue Corporation"; "Green Enterprises")
- C. FIELD companyName := @Replace(companyName; "Blue Corporation"; "Green Enterprises")
- D. FIELD companyName := @ReplaceSubstring(companyName; "Blue Corporation"; "Green Enterprises");

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

**QUESTION 22** Gwen would like to create an "ATTENTION" line that will toggle on and off each second.

What can Gwen do to provide the blinking text?

- A. In the desired location on the page, enter "ATTENTION", and set the desired font properties. From the Paragraph Styles tab of the text Properties, select Blink. The default interval is 1000 milliseconds.
- B. Open the page in Domino Designer and create a two-row Table. Type "ATTENTION" in one of the table rows, setting the desired font properties . Click the Programmed table button in the Table Type section. On the Table Programmingtab, click "Animated" for the mode, and enter 1000 for the Frequency option.
- C. In the desired location on the page, enter the following: <blink ms="1000">ATTENTION</blink> Highlight the "ATTENTION" text and set the desired font properties. From the menu bar, select Text > Pass-Thru HTML.
- D. Open the page in Domino Designer and create a two-row Table. Type "ATTENTION" in one of the table rows, setting the desired font properties. Click the Animated table button in the Table Type section. On the Table Rows tab of theTable properties, enter "1000" after "Switch row every".

**Correct Answer:** D

**Explanation/Reference:**

**QUESTION 44**

Nora is writing an agent to update certain documents. She needs to ensure that the only records processed are records in which the Model field has a value of "Compact".

Which one of the following statements will Nora include in her agent, and where will the line be placed?

- A. SELECT Model = "Compact";  
Last line in the agent
- B. @If (Model = "Compact";@Success;@Failure);  
First line in the agent
- C. SELECT Model = "Compact";  
First line in the agent
- D. @If (Model = "Compact";@Success;@Failure);Last line in the agent

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

**QUESTION 45** Minh supports the Change Control database. He has been asked if he can change the "by Month" Calendar view so that the days that are outside of the selected month are displayed with a light gray background and dark gray text.

What can Minh do to address this request?

- A. Create a hidden column immediately before the StartDate column in the view. Select the "Use value as color" option. Code a formula to evaluate to one set of RGB values for Background and Text if the date is in the current month, and a different set of RGB values for dates outside the current month.
- B. Modify the "Date Area" option on the View properties Styles tab. Select a light gray background and set the Text color to dark gray. Modify the colors for background and text in the Current option area to differentiate the gray scheme.
- C. Modify the "Monthly" option on the View properties Styles tab. Select a light gray color for the "Not current" color, and select a dark gray color for the Text color.
- D. This request cannot be met completely, but Minh can set the Body Background color for the entire view on the View properties Styles tab. He can then control the Text colors by creating a hidden column set to "Use value as color", and by coding a column value formula to evaluate to RGB values.

**Correct Answer:** C

**QUESTION 48**

Tresa's users sometimes forward SalesOrder documents to coworkers if they have a question about the order. When the recipient of the forwarded document opens the mail message, they see an error message before the document opens. Tresa has determined that a hot-spot button on the SalesOrder form references code from the SalesOrder form.

How can Tresa allow her users to forward documents without this button being forwarded?

- A. Open the SalesOrder form. From the Advanced tab of the Form properties, select "Send as RT Item" from the "On Send" options.
- B. Open the SalesOrder form. From the Security tab of the Form properties, select "Disable printing/forwarding/copying to clipboard".
- C. Open the SalesOrder form and click on the hot-spot button. Add a hide formula of "@IsDocBeingForwarded".
- D. Open the SalesOrder form and click on the hot-spot button. Select "Copied to the clipboard" from the Hide tab of the Button properties.

#### QUESTION 55

The graphic designer at Roshni's company has developed a graphic theme to be applied to all of the company's HR databases. Roshni has created a new image resource using the twistie.gif provided to her, but the categories in the views do not appear the way the graphic designer had described.

What could be the problem?

- A. Roshni was given a single 16x16 pixel image of the image that should display for a collapsed category. The image resource needs to be a 33x16 pixel image a 16x16 gif of the image for collapsed categories, followed by a one-pixel vertical spacer, and a 16x16 gif of the image for expanded categories.
- B. Roshni received two 16x16 pixel images – one for expand and one for collapse, but she has updated the Column properties. She now needs to designate a 16x16 resource image for the “Expand twistie” and a 16x16 resource image for the “Collapse twistie” options on the Column Properties box.
- C. Roshni received a single 33x16 pixel image, containing a 16x16 gif of the image for collapsed categories, followed by a one-pixel vertical spacer, and a 16x16 gif of the image for expanded categories. She created the image resource, but she needs to select the “Animated gif” option.
- D. Roshni received two 16x16 pixel images – one for expand and one for collapse. But she imported the image resources as “open.gif” and “close.gif”. The images must be named “expanded.gif” and “collapse.gif”.

#### QUESTION 97

Ken would like to allow remote salespeople to replicate information from the videoinfo.nsf application to their laptops, so that the replications are fast and the application on each laptop isn't too big. Each salesperson should only replicate the information from their territory.

Which one of the following does Ken need to do to configure this?

- A. Use AuthorName fields to limit access to information.
- B. Use a selective replication formula.
- C. Give the salespeople reader access to the application.
- D. Give the SalesPeople group the [TerritoryOnly] role

**Correct Answer: B**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

#### QUESTION 98

Henry has an executable file stored as a file resource in his database. He wants to make this file available for use via a Web browser, using the URL syntax: http://server/db.nsf/filename?OpenFileResource.

What additional things does he need to do?

- A. He needs to enable the “Use File Resources on the Web” database property.
- B. He needs to update the MIME type property in the File Resource properties field to “application/executable”.
- C. He doesn’t need to do anything else. The file will be available to users as is.

An executable file cannot be made available to Web browsers as a file resource.

C

**QUESTION 99** Jack cannot get two buttons on his Web form to display when using a Web browser.

What is the most likely cause of this problem?

- A. The form property "Web Access: Show buttons" must be selected.
- B. Only the Submit button displays for Web clients.
- C. Multiple buttons on a form must be coded using JavaScript.
- D. The database preference "Web access: use JavaScript when generating pages" is not selected.

**QUESTION 115**

The Video application ACL supports 3 types of users:

1. Users who can only view information in the application.
2. Users who can view, enter, and edit the information they have entered in the application.
3. Users who can view and modify any document in the application.

Cyd created groups in the Directory to hold the names of the different user types:

1. Video Viewers
  2. Video Creators
  3. Video Modifiers
- Cyd adds the three groups and wants to control the access of different users.

In which one of the following ways should he assign access levels?

- A. 1. Video Viewers = Reader

D.

**Correct Answer:**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

- 2. Video Creators = Author
- 3. Video Modifiers = Editor
- B. 1. Video Viewers = Readers
- 2. Video Creators = Depositor
- 3. Video Modifiers = Designer

- C. 1. Video Viewers = Reader  
2. Video Creators = Editor  
3. Video Modifiers = Editor
- D. 1. Video Viewers = Reader  
2. Video Creators = Editor  
3. Video Modifiers = Manager

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### QUESTION 116

Several users have been calling to report that they cannot print documents from the Sales Reports database. They all have Editor access to the database and can read and edit all documents, but the File > Print option and the Print icon are grayed out.

What could be the problem?

- A. The document are encrypted. Encrypted documents can be viewed and edited by users with the correct key, but these documents cannot be printed.
- B. The database ACL option "Replicate or copy documents" has been selected to prevent the creation of local replicas. This setting also prevents printing of the documents from the within the database.
- C. The "Disable printing/forwarding/copying to clipboard" option has been selected on the Security tab of the Database properties.
- D. The "Disable Field Exchange" option has been selected from the Info tab of the Form properties. This option prevents data from being exchanged with other applications and sending the data to the printer.

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### QUESTION 117

Jason coded and saved a scheduled Java server agent that should execute on ServerX. The agent does not run at all, even though Jason signed it with his Notes id.

Given that the agent manager is running on the server, which one of the following should Jason check first to diagnose the problem?

- A. Check whether Jason is in the "Database administrators" list on the server document.
- B. Check the Agent security tab to make sure that "Run as web user" is selected.
- C. Check whether an anonymous user is allowed to run agents on the server.
- D. Check whether Jason is in either the "restricted" or "unrestricted" agents list on the server.
