Adobe Experience Manager Forms Developer ACE Exam

Version 1.0

Exam A

QUESTION 1
A client uploads XDPs from Workbench. The client cannot render the forms as HTML5. What should the client do?

A. Change the time interval on the FormsReplicationScheduler
B. Change the profile resource super type in the FormsManager AddOn Configuration
C. Change the FormsManager AddOn Configuration to synchronize synchronously
D. Change the time interval on the FormsManager AddOn Configuration

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 2 How should a developer support mobile devices for the Search and
Lister component?

A. Within the edit dialog of the search pane, click the Enable Mobile checkbox
B. Within the edit dialog of the list pane, click the Enable Mobile checkbox
C. Build a custom component
D. Do nothing. The component adjusts accordingly

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:
Explanation:
Forms Portal Search & Lister component is mobile device friendly and adapts accordingly. All three default views: Grid, Card, Panel relayouts according to the device in which site is opened provided with the fact that web page also adapts. The simple fact is that, Search & Lister is a component only and does not govern page level styling.

QUESTION 3 What is a reason to use a form fragments when designing templates to be
rendered as PDF?

A. To fully integrate with analytics
B. To allow multiple forms to use the same fields
C. To improve publisher system performance
D. To make sure fragments are not replicated to a publisher

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
Reference: https://helpx.adobe.com/aem-forms/6/forms-service.html

QUESTION 4
A Watched Folder endpoint throws a coercion error when consuming an XML variable. What is causing this error?

A. A Watched Folder can only consume a Document variable
B. A Watched Folder can only consume a List of Documents
C. A Watched Folder can only consume a String variable
D. A Watched Folder can only consume a Map of Documents

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 5 Instance Manager must be used to remove a row. Which line of code should be used to
perform this task?

A. row_name.instanceManager.removeInstance(this.row_name.instanceIndex);
B. instanceManager.removeInstance(this.row_name.instanceIndex);
C. row_name.instanceManager.removeRow(row_name.instanceIndex);
D. instanceManager.removeInstance();

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:
Reference: https://help.adobe.com/en_US/livecycle/11.0/DesignerHelp/WS92d06802c76abadb11a7f71129b8b00825-7fa6.2.html

QUESTION 6 What is an advantage of implementing an
HTML5 form set?

A. The ability to replicate to a publisher instance
B. The ability to implement form sets without requiring special permissions on the dispatcher
C. The ability to bundle XFA templates together and restrict those templates based on user input
D. The ability to bundle XFA templates together and display those templates based on user input

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:
Reference: https://helpx.adobe.com/aem-forms/6/html5-forms/designing-form-template.html

QUESTION 7 You are creating a form in AEM Forms Designer. The visibility of a form field is set to hidden. What
is the result?

A. The field is removed from the layout on render
B. The field remains at the same X.Y position and is replaced with a blank space
C. The field is removed from the layout
D. The field remains at the same X.Y position and is removed from the layout

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:
Reference: https://help.adobe.com/en_US/AEMForms/6.1/DesignerHelp/WS107c29ade9134a2c583558f12a7dc955d9-8000.2.html

QUESTION 8 An organization needs a reusable function in a design template that receives a numeric value. How should the function
be declared?

A. function ProcessData(var value)
B. function ProcessData(value)
C. function ProcessData(int value)

D. public void ProcessData(int value)

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:

QUESTION 9 What is a use case for an
Adaptive Document?

A. To create an interactive web-based representation of a PDF portfolio that can be embedded into a site
B. To capture user information and drive users through a series of screens (dynamic interactive)
C. To create an Adaptive Form that can be saved offline and allow a mobile workforce to continue to work
D. To display a user account balance after a transaction on a site (non-interactive)

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:
Reference: https://helpx.adobe.com/aem-forms/6-1/adaptive-document.html

QUESTION 10 What is the purpose of
/libs/fd/fm/content/manage.json?

A. To return a list of formsets that match a specific criterion
B. To return a list of servlets that match a specific criterion
C. To return a list of forms that match a given criterion
D. To return a list of custom components that match a specific criterion

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:
Reference: https://helpx.adobe.com/aem-forms/6/listing-forms-webpage-using-apis.html

QUESTION 11
A developer must change the structure of the input xml before passing it on to the next service. As a best practice, how should this task be performed?

A. By writing an XSLT
B. By looping through manually in the process
C. By using a lot of setvalue objects
D. By writing code in a script object

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 12 A field is set to hidden. What happens to the field when a Document of
Record is generated?

A. The field is excluded if 'Exclude fields from DoR if hidden' is selected in the Document of Record settings
B. The field is automatically included in the Document of Record

C. The field is automatically excluded from the Document of Record
D. The field is included if 'Include fields from DoR if hidden' is selected in the Document of Record settings

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:
Reference: https://helpx.adobe.com/experience-manager/6-2/forms/using/generate-document-of-record-for-non-xfa-based-adaptive-forms.html

QUESTION 13 Which annotation does a Remote
Function require?

A. @ServiceMethod
B. @Service
C. @Properties
D. @Component

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:
Reference: https://helpx.adobe.com/aem-forms/6-1/expression-builder.html

QUESTION 14 For a given solution, a developer investigates an error where data is being received by the process from a web service call. The data does not show up in the HTML5 form. Where should the developer look to find what is causing this issue?

A. The server memory
B. The white list settings on the server
C. Schema Bindings of the form
D. The data field visibility option on the form fields

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 15 What feature is NOT supported by a
'Document of Record'?

A. Data binding
B. Rich text
C. Printing
D. XDP creation

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
Reference: https://helpx.adobe.com/aem-forms/6-1/generate-document-of-record-for-non-xfa-based-adaptive-forms.html

QUESTION 16
What is the correct way to configure a process to use a watched folder endpoint?
A. Either in workbench or in the administration console

B. In workspace
C. Using the command line in the console
D. Either in workspace or in the administration console

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:
Reference: https://help.adobe.com/en_US/livecycle/10.0/ProgramLC/WS624e3cba99b79e12e69a9941333732bac8-7e61.html#WS624e3cba99b79e12-784df6291336a35ab5a-7ffe

QUESTION 17 An email endpoint is configured with the following domain pattern: *aem.com.
What is the result?

A. Email addresses that have aem.com are mass emailed
B. Email addresses that have aem.com are processed
C. Email addresses that contain referrer aem.com are processed
D. Email addresses that have aem.com are rejected

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
Reference: https://help.adobe.com/en_US/AEMForms/6.1/ProgramLC/WS624e3cba99b79e12e69a9941333732bac8-7e5f.2.html

QUESTION 18 What is the difference between the &lc_version and &version request parameters in a
SOAP endpoint?

A. version is the Workbench and lc_version is the process engine
B. lc_version is the process engine and version is the application
C. version is the process engine and lc_version is the Workbench
D. version is the process engine and lc_version is the application

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 19 Why should an adaptive form author implement server-
side revalidation?

A. To run more complex validation logic
B. To maintain the integrity of validation scripts
C. To have the server verify the data in case the end user bypassed validation logic logically
D. To have the server verify the integrity of the data in case corruption occurred during transit

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:
Reference: https://helpx.adobe.com/aem-forms/6/configuring-submit-actions.html#ServerSideRevalidationinAdaptiveForm

QUESTION 20

A developer needs to render an adaptive form with a specific locale. The developer cannot use the afAcceptLang and Accept-Language parameter. Which process should the developer use?

A. Language setting of the user specified in AEM
B. Modify the global dictionary locale
C. Modify the render policies locale
D. Modify the locale in the templates from container

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:
Reference: https://helpx.adobe.com/aem-forms/6-1/supporting-new-language-localization.html

QUESTION 21
A form must be rendered with XML data. The rendered PDF form will be sent to an end user to sign. What are the appropriate document services to implement such a process?

A. Forms merges a template with a data and Digital Signatures enables the use of signature fields
B. Forms merges a template with the data and Reader Extensions enables the use of signature fields
C. Reader Extensions merges a template with the data and Forms enables the use of signature fields
D. Output merges a template with the data and Reader Extensions enables the use of signature fields

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 22 In which situation should an eligibility expression be
used in a form set?

A. Specific Form script should only trigger the logged in user possesses certain CRX permissions
B. A specific form in the set should be hidden unless the user enters an age of over 18
C. A specific formset should not appear in Forms Portal unless the user uses a specific locale
D. A specific field should not appear unless the user selects a specific country

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
Reference: https://helpx.adobe.com/aem-forms/6-1/formset-in-aem-forms.html

QUESTION 23 What service within AEM is used to stitch multiple documents together resulting in an
interactive PDF?

A. Digital Rights Management
B. Output
C. Assembler
D. Reader Extensions

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:
Reference: https://helpx.adobe.com/pdf/aem-forms/6-2/ddxRef.pdf

QUESTION 24 A client needs to modify the "Guide LiveCycle Process Locator and Invoker" configurations. Why does this change
need to be made?

A. The client incoming XML data does not match the output XML
B. The client needs to map data to an AEM Forms workflow process
C. The client output XML data does not match the input XML
D. The client needs to map data to an AEM workflow

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:
Reference: https://helpx.adobe.com/aem-forms/6/submit-form-data-livecycle-process.html

QUESTION 25 A developer needs to export a Correspondence Management solution. What should be the file type of the
exported package?

A. LCA
B. CMP
C. ZIP
D. CM

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
Reference: https://helpx.adobe.com/experience-manager/6-2/forms/using/import-export-forms-templates.html#ImportandexportassetsinCorrespondenceManagement

QUESTION 26
An XML variable is not being updated when its content is modified and passed as data into a form. What is the appropriate way to debug this problem?

A. Change the data type from XML to String variable
B. Check the Xpath expression to make sure that the node reference is correct
C. Change the data type from XML to a document variable
D. Check the log file for any errors that involve invalid XPATH expressions

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:
Reference: https://help.adobe.com/en_US/livecycle/11.0/WorkbenchHelp/WS92d06802c76abadb-1cc35bda128261a20dd-7f50.2.html

QUESTION 27
A user wants to enable Reader to save form data from a Microsoft SharePoint server through an integration connector. How should the connector be configured?

A. Configure the AEM JCR to SharePoint connector on the AEM server
B. Create a custom component on the AEM server to communicate with the SharePoint server
C. Open the SharePoint document through Acrobat and Reader Extend the document locally
D. Configure the SharePoint to the AEM JCR connector on the SharePoint server

Correct Answer: A

Section: (none)
Explanation
Explanation/Reference:

QUESTION 28 Which type of key is needed to
enable Adobe Sign?

A. Configuration Key
B. Integration Key
C. Adobe Sign Key
D. Integration Service Key

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
Reference: https://forums.adobe.com/thread/2391184

QUESTION 29 What is the input path of a watched folder whose input is the result of a different
watched folder?

A. Configure \path\output folder as input to the watched folder
B. Configure \path\input folder as input to the watched folder
C. Configure \path\result folder as input to the watched folder
D. Configure \path\stage folder as input to the watched folder

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:
Reference: https://helpx.adobe.com/experience-manager/6-2/forms/using/admin-help/configuring-watched-folder-endpoints.html

QUESTION 30
A developer is working a Document of Record template. Which naming convention should be used under the AF_FIELDSSUBFORM subform?

A. AF_<name of the field in all caps>_XFO eg.AF_CHECKBOX_XFO
B. <name of field in all caps>_AF eg.CHECKBOX
C. AF_<name of field in all caps> eg.AF_CHECKBOX
D. AF_<name of field in all caps>_XFO eg.AF_checkBox_XFO

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:
Reference: https://helpx.adobe.com/aem-forms/6-1/generate-document-of-record-for-non-xfa-based-adaptive-forms.html

QUESTION 31 In which scenario should global XML elements be
used in a form set?

A. Common fragments exist within the form set
B. Common fields exist across multiple forms in the form set
C. Common form subforms exist within the form set
D. Common form widgets exist within the form set

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
Reference: https://helpx.adobe.com/pdf/aem-forms/6-2/central-aem-forms-migration.pdf (p.41)

QUESTION 32
A form developer loads an adaptive form without the wcmmode=disabled query string parameter. What is the result?

A. The form does NOT load correctly
B. Apache String throws a null pointer error
C. Apache String throws a missing parameter exception
D. The form loads correctly

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:
Reference: https://helpx.adobe.com/experience-manager/6-3/forms/using/embed-adaptive-form-external-web-page.html

QUESTION 33
Why should a developer use the SOAP endpoint?

A. To transmit form data over HTTP
B. To transmit form data over AMF
C. To transmit form data over EJB
D. To transmit form data over FTP

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 34
Which script should be used to retrieve every instance of the textfield within a repeating subform?

A. var fields = xfa.host.resolveNodes("subform[*].textfield");
B. var fields = xfa.resolveNode("subform[*].textfield");
C. var fields = xfa.resolveNodes("subform.textfield[*]");
D. var fields = xfa.resolveNodes("subform[*].textfield");

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:

QUESTION 35
When batch processing a large number of files, a developer will leverage the Output component to render the respective PDF files. A large sample test file provided to the developer from the client causes an Out of Memory exception and terminates the process during execution. What should the developer do to fix the problem?

A. Review error logs and perform fix as described in logs
B. Select a smaller data file to complete the development

C. Increase the JVM heap sixe and test the process again
D. Use the SDK instead of Workbench to develop the solution

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 36 What is the benefit of using a database when installing AEM
Forms 6.2 OSGi?

A. Better data integrity
B. Support for redundancy
C. Better search optimization
D. Support for clustering

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 37 What is a best practice to maintain exception messages in a process orchestration
in Workbench?

A. Maintain exception messages in a configuration file
B. Use the script activity to maintain exception messages
C. Handle exceptions externally to the process
D. Hard code exception messages in a process

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 38 When would you use the slingRequest.setAttribute("data", data
XML) line of code?

A. To pre-populate form data
B. To set XML meta-data
C. To create dynamic data within a form
D. To pull data from a form

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:
Reference: https://helpx.adobe.com/aem-forms/6/prepopulate-adaptive-form-fields.html#Supportedprotocolsforprepopulatinguserdata

QUESTION 39 Form tagging is implemented with a high form volume-client.
What is the result?

A. Improved Image Quality
B. Improved Lazy Loading
C. Improved Search Time
D. Improved Render Time

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:

QUESTION 40 Why should a developer add the 'addfields.jsp' to the custom
submit sling:Folder?

A. To register the custom submit action for use within the CRX
B. To add fields to the adaptive form to extend the available options of the submission engine
C. To control which form fields will be submitted and consumed by the submission target
D. To expose additional input in the dialog window within the component

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 41 In which situation must a custom Workflow Step
Component be created?

A. Additional metadata needs to be persisted in the Workflow
B. The step requires an editable title and description
C. The Workflow has exceeded its maximum size
D. To extend the capabilities of the workflow

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:
Reference: https://helpx.adobe.com/experience-manager/using/custom_step_dialog.html

QUESTION 42 A high volume solution requires a developer to validate the input XML before it can be used by other services. How should this use
case be handled?

A. By writing a validator in a script object
B. By checking off 'validate input' on the input variable
C. By manually validating each item in the XML structure
D. By writing a validator custom component

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:
Reference: https://help.adobe.com/en_US/livecycle/11.0/DesignerHelp/designer_11_help.pdf

QUESTION 43

Which three main properties are required to create a remote function?

A. connectors.xmlinvoker, connectors.xmlinvoker.alias, exm.service
B. connectors.jsoninvoker, connectors.jsoninvoker.alias, exm.service
C. connectors.jsoninvoker, connectors.jsoninvoker.alias, exm.impl
D. connectors.xmlinvoker, connectors.xmlinvoker.alias, exm.impl

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
Reference: https://helpx.adobe.com/aem-forms/6-1/expression-builder.html

QUESTION 44 When would you add a new action field to an
Adaptive Form?

A. To display the users currently available actions in the process
B. To create a drop-down list that automatically loads data based on script
C. To create a hidden field that stores values for later use by the submission script
D. To add a field that only appears during a form review that stores notes

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 45 A developer is writing a file to the system. The developer receives an access denied error message. What should the developer do
to fix this error?

A. Make sure the location where AEM writes data has access permissions
B. Check the local security policy, OS Event log for unauthorized access messages
C. Stop the process and start as "Run as Administrator"
D. Delete the error message from the log file

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 46 Custom fonts are used in an HTML5 form.
What is the result?

A. HTML5 forms only support Calibri fonts
B. HTML5 forms do not support font embedding
C. HTML5 forms increase in size once the font is embedded
D. HTML5 forms cannot render custom fonts

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:

QUESTION 47 Which two translation options exist when localizing Adaptive
Forms? (Choose two.)

A. Human Translation
B. Static Translation
C. Dynamic Translation
D. Machine Translation

Correct Answer: AD
Section: (none)
Explanation

Explanation/Reference:
Reference: https://helpx.adobe.com/experience-manager/6-2/forms/using/using-aem-translation-workflow-to-localize-adaptive-forms-.html

QUESTION 48 Which activity should be used to modify a single node in
an XML object?

A. SharePoint Connector
B. Set Value
C. Script Object
D. File Utils

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 49 A watermark must be placed on image files before the files are archived. What is the appropriate document service to implement
such a process?

A. Output converts, flattens, and places a watermark on the converted PDF
B. Assembler places a watermark onto the image file
C. PDF Generator converts the image to a PDF. Assembler places a watermark on the generated PDF
D. Document Security applies a security policy that applies a watermark onto the image

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 50 What is an effect of removing nav_footer.jsp from the
render profile?

A. To disable a user-triggered script
B. To remove the form footer
C. To disable widgets on the form
D. To remove lazy loading on the form

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:
Reference: https://forums.adobe.com/thread/2338343

QUESTION 51 What is the purpose of using Button.relevant="-print" in a
designer template?

A. To disable the form and make sure it is not allowed to print
B. To make the button visible during design time and printing
C. To make the button visible during design time and hide it during printing
D. To hide the button during design time and printing

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:
Reference: https://help.adobe.com/en_US/livecycle/10.0/DesignerScriptingBasics/WS92d06802c76abadb57cc1b6e12a92343946-7ffe.html

QUESTION 52
How does AEM automate translations?

ChecCheck off generate
Translation automatically
Review result
Save result

Use Config Designer to generate resource ID values
Use XSLT to extract resources from the template into XLIFF format
Use an XLIFF-based translator
Use XSLT to import and update the template

Add a Dictionary to a Translation Project
Select Machine Translation
Select the appropriate Translation Provider/Cloud Configuration
Start the Translation Job

Check off generate resouCheck off generate resource ID values within the properties of the
Adaptive Form
Review the Translation Project
Select the appropriate Translation Provider/Cloud Configuration

A.

B. C.

D.

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:

QUESTION 53 How should a developer hide the Search pane in the Search and
Lister component?

A. Within the component, deselect the Enable Search checkbox
B. Within the component, select the Hide Search checkbox
C. Within the component, select the Disable Search checkbox
D. Within the component, deselect the Show Search checkbox

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:

QUESTION 54
A department within an organization has a business requirement
 To create a dynamic table in which the user can add rows. Instance Manager will be used to meet this requirement. Which
line of code will add another row?

A. row_name.instanceManager.addInstance()
B. instanceManager.addInstance()
C. addInstance()
D. row_name.instanceManager.addRow()

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:

QUESTION 55 The "func" parameter is not supplied to the manage.json endpoint.
What is the result?

A. An unfiltered response is returned
B. A list of services that matches a specific criterion is returned
C. A JSON object with a null pointer is returned
D. A JSON object with an error is returned

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:

QUESTION 56 A Watched Folder is configured with the following include file pattern: *.[Nn][Ww][Qq]. Which files are
allowed through?

A. Files that start with .nwq (case sensitive)
B. Files that contain .NWQ (case sensitive)

C. Files that end with .NWQ (case insensitive)
D. Files that end with .NWQ (case sensitive)

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 57 A client experiences connectivity issues when trying to view an HTML5 form from their browser. Which log should be checked to
ensure connectivity?

A. The request log
B. The audit log
C. The access log
D. The application server log

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:
Reference: https://helpx.adobe.com/aem-forms/6/html5-forms/enable-logs.html

QUESTION 58
User-specific data must be loaded into a form when a user opens the form as part of a Workspace endpoint. How should the data be provided to the renderer?

A. By creating a custom render component
B. Through the use of a Prepare data process specified in the forms Action Profile
C. By specifying a value in the Initial Task Data drop down in the presentation and Data section of the Workspace startpointD. By specifying a value in the Form Data drop down menu in the Input section of the Workspace startpoint

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 59 In designer, which workflow allows a textfield to expand and span multiple pages of a
form template?

A. Select Allow Page Breaks within Content option and set the form content property
B. Select Allow Multiple Lines, Allow Page Breaks within Content options, and set the form content property
C. Select Allow Multiple Lines and Allow Page Breaks within Content options
D. Select Allow Span Lines option only and deselect Prevent Page Breaks

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:
Reference: https://help.adobe.com/en_US/livecycle/11.0/DesignerHelp/WS92d06802c76abadb11a7f71129b8b00825-7fdd.2.html#WS92d06802c76abadb11a7f71129b8b00825-7fdb.2

QUESTION 60 All expressions evaluate to false. Which element within a condition block can be used to
populate data?

A. Static

B. Final
C. Default
D. Case

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 61
Which variable types can be used to store XML data in a Workflow process?
A. XML and FormDataSet
B. XML Only
C. Document and XML
D. FormDataSet only

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
Reference: https://help.adobe.com/en_US/AEMForms/6.1/WorkbenchHelp/WS92d06802c76abadb-1cc35bda128261a20dd-7f50.2.html

QUESTION 62 A parent process invokes a subprocess without modifying the parent process security settings.
What is the result?

A. The subprocess queries for authentication parameters
B. The subprocess inherits authentication from the calling process
C. An error email is sent to the Administrator
D. Authentication from the subprocess is queried to the system administrator

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 63
How are Documents of Record enabled in TouchUI?

A. Under the Form Model section of the Form properties
B. By selecting Create Document of Record in the Form Manager
C. Automatically when the form is published
