Implementing Aruba Location Services

Version 1.0

Exam J

QUESTION 1 How is ALE licensed?

- A. one enterprise license per controller
- B. one license per user
- C. one license per AP
- D. one license per server

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

Reference: http://www.arubanetworks.com/assets/ds/DS_ALE.pdf

QUESTION 2 What is required for OAuth2 integration between the Meridian Editor and ClearPass? (Select two.)

- A. The ClearPass Server must have a public IP address.
- B. The ClearPass Server must have a public certificate.
- C. The Meridian Editor must have a public certificate.
- D. The ClearPass Server must be configured to send authentication requests to the Meridian Editor.
- E. ClearPass must have COA (Change of Authorization) enabled.

Correct Answer: AB

Section: (none)

Explanation

Explanation/Reference:

QUESTION 3

An app developer tests a campaign to ensure it triggers and provides a notification to the iPhone. The notification appears once on the device. The developer continues to test and 10 minutes later the developer tries to trigger the campaign to send the notification again to the device. The notification is not received on the device.

What does the developer need to do to make the campaign trigger and send another notification? (Select two.)

- A. Reset the campaign in the Beacons Apps.
- B. Reset the campaign in the Meridian Editor.
- C. Reset the beacon with the Beacons Apps.
- D. Set the campaign as ready in the Meridian Editor.
- E. Bring the device within range of the proximity beacons.

Correct Answer: CE

Section: (none)

Explanation

Explanation:

QUESTION 4

A network engineer plans an Aruba BLE beacons deployment for an airport to provide location and proximity for the airport's app. What does the engineer need to consider about Aruba BLE beacons?

- A. They enable blue dot on iOS and Android AppMaker venue apps.
- B. They require GPS-enabled devices to configure beacons with the Beacons App.
- C. They require iOS 4.01 or later to configure beacons with the Beacons App.

D. They use Wi-Fi APs and controllers for location and notifications.

Correct Answer: D

Section: (none)

Explanation:

QUESTION 7

An app developer tests a campaign to ensure it triggers and provides a notification to a mobile device. The notification appears on the device and now the campaign shows a status of inactive.

What does the developer need to do to make the campaign trigger and send another notification?

- A. Reset the campaign in the Beacons Apps.
- B. Reset the beacon with the Beacons Apps.
- C. Reset the campaign in the Meridian Editor.
- D. Bring the device within range of the location beacon.

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

Explanation:

QUESTION 8 Which statement is correct about the power level of Aruba Beacons?

- A. The power level can be changed on a location beacon and a USB beacon, but not on a proximity beacon.
- B. The power level of a proximity beacon can be changed, but the power level of a location beacon cannot be changed.
- C. The power level can be changed for all Aruba Beacon modes and will determine coverage area.
- D. The power level cannot be changed on either a location or a proximity beacon, but can be changed on an Aruba Sensor and a USB beacon.

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

QUESTION 9

A network engineer plans a beacon deployment with Aruba blue dot location-based services. The deployment uses both battery-powered and USB beacons. What is a primary difference between battery-powered beacons and USB beacons that is useful for the engineer to know for this deployment?

- A. USB beacons do not need to be connected to a power source, but battery-powered beacons do.
- B. Battery-powered beacons do not need to be connected to an external power source, but USB beacons do.
- C. Battery-powered beacons can be configured as location beacons. But USB beacons cannot.
- D. USB beacons can be remotely managed, but battery-powered beacons cannot.

Explanation:

QUESTION 17

A network engineer is troubleshooting the jumpiness of a blue dot in a location-enabled Meridian-powered app. The network engineer determines that it is located in a reflective physical environment. Which deployment model will perform better in this environment?

- A. Area
- B. Multipath
- C. Path
- D. Reflective

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

Explanation:

Reflective environments, such as areas with marble floors, may result in jumpiness of the blue dot. Carpeted areas have shown better blue dot stability than areas with marble floors. In locations where reflective surfaces are unavoidable, consider using the path model instead of the area model.

QUESTION 63

A customer has an Aruba Wi-Fi deployment with 20 AP-325s around their 100,000 square foot (9,290.30 square meter) facility. The customer now wants to implement Aruba location services with the use of a venue Meridian app, along with Bluetooth as the technology for positioning.

Which type of information should the network administrator share with the customer to prepare them to meet their goal?

- A. The customer can use their AP-325s as beacons, but may require more battery-powered beacons for an optimized indoor positioning deployment
- B. The customer will not need to purchase any more equipment since they already have AP-325s
- C. The customer will need to purchase USB beacons for management, but otherwise their AP-325s will handle the indoor positioning.
- D. The customer will need to swap out their AP-325 deployment with battery-powered beacons, as they cannot be mixed in a deployment.

Correct Answer: C

QUESTION 66

A hotel network engineer wants to create a Meridian-powered app to provide users with information about restaurants, hotel rooms, and activities at the hotel. Blue dot wayfinding is not required for the deployment, but the venue would like users to get directions from one area of the hotel to another area in the hotel. Which types of apps meet these needs? (Select two.)

- A. informational only
- B. beacons enabled
- C. location aware
- D. blue dot enabled
- E. self-guided wayfinding

Correct Answer: BC
