C_TPLM40_65

SAP Certified Application Associate - Quality Management with SAP ERP 6.0 EHP5

Exam A

QUESTION 1
The audit plan is hierarchically structured.

A. Correct
B. Incorrect

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 2
The BAPI technology allows the customer to implement customer-specific selection and mapping procedures.

A. Correct
B. Incorrect

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 3
In inspection planning, you create material-related information that is used when this material is inspected.

A. Incorrect

B. Correct

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 4
An activity consists of the following elements (more than one answer is true):

A. Long text
B. Processing quality factor
C. Short test
D. Processing deadlines
E. Catalog entry

Correct Answer: ABD
Section: (none)
Explanation

Explanation/Reference:

QUESTION 5
The work performed and costs incurred during results recording or when the usage decision is made can be confirmed in a QM order.

A. Using direct activity allocation
B. In cost processing

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 6
In which of the following you can display the information for multiple specifications functions and valuate them at characteristic level:

A. Results Recording Worklist
B. Record inspection results for the batch
C. Record inspection results for the lot
D. Record inspection results for the inspection point
E. Record inspection results for the operation

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 7
Notification category 05 belongs to:

A. Service notifications
B. General notifications
C. Claim notifications
D. Quality notifications
E. Maintenance notifications

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 8
A notification item consists which of the following elements? (More than one answer is true.)

A. AssemblyBill of material item
B. Catalog entry for defect location

C. Number of defects identified
D. Catalog entry for defect type (defect class)

Correct Answer: BCD
Section: (none)
Explanation

Explanation/Reference:

QUESTION 9
You can use the Quality Notifications to support the RMA (Return Material Authorization) process in your company.

A. Incorrect
B. Correct

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 10
These are prerequisites to inspection lot creation:

▪ The inspection type is active in the material master
▪ QM is active in the table of movement types

A. Incorrect
B. Correct

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 11
The dynamic modification rule defines the inspection stages and the conditions for an inspection stage change.

A. Correct
B. Incorrect

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 12
Which statements are correct? (More than one answer is true.)

A. The MPN profile defines how you can work with MPN materials in the procurement process.
B. Stock posting is generally performed in the Quality unit of measure of the material.
C. An manufacturer part number profile (MPN profile) is assigned to an internal material in the material master.
D. The function group *QEVA_ALT_QUANTITY_INPUT* contains coding that makes it possible to enter quantities in alternative units of measure.

Correct Answer: AC
Section: (none)
Explanation

Explanation/Reference:

QUESTION 13
Which statements are correct? (More than one answer is true.)

A. The procurement data in the Quality Management view affects sales.
B. You use the inspection setup to define if and where the material is to be inspected.
C. During inspection planning, you access different master data.
D. QM-specific data is maintained at plant level.

Correct Answer: BCD

Explanation/Reference:

QUESTION 14

Which statements are correct? (More than one answer is true.)

A. You cannot assign an individual inspection plan to each inspection type and status.
B. The status profile stipulates a sequence for inspection lot processing.
C. A further goods receipt for the material and delivery is only possible for the model lot if the usage decision was "OK".
D. A further goods receipt for this material/vendor is not possible if the model inspection has not been completed.
E. The inspection lots can be processed simultaneously.

Correct Answer: BD
Section: (none)
Explanation

Explanation/Reference:

QUESTION 15

Which statements are correct? (More than one answer is true.)

A. You use control charts to control or monitor one or more processes. In the task list characteristics, you use the SPC criterion to define these processes are to be combined or separated from one another (which inspection lots refer to a common control chart).
B. The SPC criterion controls how processes are combined or separated for a control chart (that is which inspection lots refer to a common control chart).
C. You make the preparations for a control chart in the sampling procedure and the task list or master inspection characteristic.
D. You cannot use the control chart to valuate inspection results. If an appropriate valuation rule is used, a sample can be rejected if at least one of the action limits in the related control chart is exceeded.

Correct Answer: ABC
Section: (none)
Explanation

Explanation/Reference:

QUESTION 16
Which statement is true?

A. After the usage decision has been made, changes cannot be made to the characteristics.
B. After the usage decision has been made, changes can be made to the characteristics.

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 17
Which statement is false? A cause consists of the following elements (choose one):

A. Short text
B. Catalog entry
C. Long text
D. Catalog text

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 18
Which are belongs to Quality Notifications Activities? (More than one answer is true.)

A. Defect analysis
B. Results recording
C. Sample management
D. Priority
E. Documentation
F. Defects recording

Correct Answer: ADEF
Section: (none)
Explanation

Explanation/Reference:

QUESTION 19
The QM System entered in the quality info record overrides the QM system entered in the vendor master record.

A. Correct
B. Incorrect

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 20
Which statements are correct? (More than one answer is true.)

A. You cannot assign an already existing QM order to a quality notification.
B. QM orders can be settled to different account assignment objects.
C. The controlling area always forms the first step in the hierarchy of an evaluation.
D. The confirmation to a QM can be performed using direct activity allocation.

Correct Answer: ABC
Section: (none)
Explanation

Explanation/Reference:

QUESTION 21
A unit to be inspected corresponds in this function to:

A. a serial number

B. a single unit

C. both

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 22
Which statements are correct? (More than one answer is true.)

A. All are false.
B. In Customizing, you can deactivate the quality inspection for certain movement types.
C. In the Standard System, all goods movements, for which inspections can be performed, have suitable inspection lot origins assigned to them.
D. Results recording can only be carried out after the sample size has been determined.

Correct Answer: BCD
Section: (none)
Explanation

Explanation/Reference:

QUESTION 23

Which notification type related to "Complaint against vendor"?

A. notification type F4
B. notification type F2
C. notification type F3
D. notification type F1

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
QUESTION 24
Inspection results are updated depending on the settings of the following parameters (more than one answer is true):

A. Material, customer
B. Material, Quantity
C. Material, vendor
D. Material
E. Material, Value

Correct Answer: ACD
Section: (none)
Explanation

Explanation/Reference:

QUESTION 25
If the inspection plan and inspection lot have been approved, you cannot include additional unplanned characteristics.

A. Incorrect
B. Correct

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 26

You can create a where-used list for the following QM-specific master data (more than one answer is true):

A. Inspection Methods
B. Code groups
C. Test equipment (PRT)
D. Sampling Procedure
E. Master Inspection Characteristics

Correct Answer: ABD
Section: (none)
Explanation

Explanation/Reference:

QUESTION 27

Statistical process control: Standardized statistical value for evaluating the quality of an inspection lot. The statistical value always has a specific reference criterion (such as a material or the material/vendor combination).

A. Incorrect
B. Correct

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 28

The unit of measurement, target value, accuracy, and upper and lower specification limits are defined for each tolerance key.

A. Incorrect
B. Correct

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 29
Which statements are correct for handling unit? (More than one answer is true.)

A. Each handling unit has an identification number on the basis of which information can be read
B. Packaging materials (such as pallets, boxes, vacuum packaging, or containers)
C. Goods (that have to be transported and stored, for example)

D. Handling Units such as numbers forklift, tractors, cranes etc.

Correct Answer: ABC
Section: (none)
Explanation

Explanation/Reference:

QUESTION 30
Which statement is correct?

A. In the standard system, inspection type "14" is reserved for the calibration inspection.
B. In the standard system, inspection type "41" is reserved for the calibration inspection.

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 31
QM is integrated in the processes of the logistics supply chain.

A. Correct

B. Incorrect

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 32
Inspection results recording must always be carried out for each inspection lot.

A. Incorrect

B. Correct

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 33
A material-dependent selection of defect codes cannot be planned.

A. Correct

B. Incorrect

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 34
When editing a bill of material or task list with the classic transactions, the whole structure is locked to other users.

A. Incorrect
B. Correct

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 35
Which statements are correct? (More than one answer is true.)

A. You perform a defect analysis on the returned goods and enter the defects in the notification.
B. If an inspection lot is used, the usage decision determines the next stage for the goods; if no inspection lot is used, a specific inventory posting can be made.
C. Repairs Processing Using an Inspection Lot.

D. Instead of using the quality notification to process the returned goods, you can create an inspection lot.

Correct Answer: BCD
Section: (none)
Explanation

Explanation/Reference:

QUESTION 36
Worklist for tasks, transaction IQS9.

A. Correct
B. Incorrect

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 37
Flexible inspection specifications are to be used where inspections can be fully planned in advance.

A. Incorrect
B. Correct

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 38
The characteristics and key figures in the QM information System allow you to pinpoint and monitor weak points in your logistical processes.

A. Incorrect
B. Correct

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 39
Confirmation at Reporting point is available for _____.

A. Discrete Manufacturing
B. Process Manufacturing
C. Repetitive Manufacturing
D. For all

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 40
Which are different processing options in the worklist?

A. Details for task list header
B. General settings for task list headers
C. QM-relevant settings for task list headers
D. Administrative data for task list headers

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 41
Process-optimized results recording enable flexible tabular characteristic processing.

A. Correct
B. Incorrect

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 42
The notification category 05 belongs to _____.

A. Claim notifications B.
General notifications

C. Maintenance notifications
D. Quality notifications
E. Service notifications

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 43
The Java Dispatcher execute the required Java code in one thread, adopt database accesses and make requested Web sites available.

A. Incorrect

B. Correct

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 44

If you do not use a sampling scheme in a sampling procedure, you should not use the inspection severities "Tightened", "Normal", or "Reduced" in the dynamic modification rule.

A. Incorrect
B. Correct

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 45
You specify the business purpose of the quality notification when you define the notification type.

A. Correct
B. Incorrect

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 46
Which statements are correct? (More than one answer is true.)

A. A customer complaint can be recorded using the Internet.

B. Documents cannot be assigned while processing a notification.
C. You can access a sales summary from a customer complaint.
D. You can switch directly to notification processing from the defects recording transaction.

Correct Answer: ABD

Explanation/Reference:

QUESTION 47
You can only create inspection characteristics for operations, not for suboperations.

A. Correct
B. Incorrect

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 48
If a planned inspection has inspection characteristics assigned to it, then _____.

A. the assignment of the sampling procedure takes place at the inspection setup in the QM view of the material master.
B. the assignment of the sampling procedure takes place at inspection characteristic level.

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 49
You can display the results history with reference to ___.

A. the type
B. inspection lot number
C. the Group

D. the batch.

Correct Answer: ACD
Section: (none)
Explanation

Explanation/Reference:

QUESTION 50
A notification item consists which of the following elements? (More than one answer is true.)

A. Short text/long text
B. Classification
C. Nonconforming quantities
D. Defect valuation

Correct Answer: BD
Section: (none)
Explanation

Explanation/Reference:

QUESTION 51
The valuation rule contains a valuation mode.

A. Incorrect
B. Correct

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:
QUESTION 52
The certificate type determines (more than one answer is true):

A. Whether a certificate is needed for each purchase order item
B. How the system reacts if the certificate is not available at goods receipt
C. Whether a certificate is needed for each goods receipt
D. All are false

Correct Answer: BD
Section: (none)
Explanation

Explanation/Reference:

QUESTION 53
Which statements are correct? (More than one answer is true.)

A. The inspection result can be stored in the system in different ways.
B. The QM inspection is not activated in the material master.
C. The quality inspection for an outbound delivery is necessary to check the quality of material or product before it leaves the premises of the manufacturer or vendor.
D. mySAP ERP Quality Management (QM) supports sales and distribution processes by executing quality inspections for goods issues.

Correct Answer: ACD
Section: (none)
Explanation

Explanation/Reference:

QUESTION 54
An inspection can be triggered at different stages in the logistics supply chain which includes (more than one answer is true):

A. Goods movements (goods receipt, stock transfer, goods issue)
B. Deadline monitoring (batch monitoring)
C. Source inspections
D. Orders (production orders, maintenance orders, delivery)

Correct Answer: ABD

Section: (none)
Explanation

Explanation/Reference:

QUESTION 55
Characteristics must be manually valuated, if they have sampling procedure assigned in the task list or material specification, or not having a sampling procedure with manual valuation.

A. Incorrect
B. Correct

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 56
The valuation type is defined in the sampling procedure using the valuation mode.

A. Correct.
B. Incorrect

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 57
You can access the inspection history from (more than one answer is true):

A. The usage decision
B. Inspection type

C. Inspection report D. Results recording

Correct Answer: AD
Section: (none)
Explanation

Explanation/Reference:

QUESTION 58
If the maximum possible lot size is exceeded, the sample size for the maximum possible lot size is used.

A. Incorrect
B. Correct

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 59
You can use quality notifications in all areas of the logistics supply chain.

A. Correct
B. Incorrect

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 60
The following notification origins exist for the notification category 02 (quality notifications) (more than one answer is true):

A. Q3, Internal problem notification

B. G1, General notification C. Q1, Customer complaint
D. Q2, Complaint against a vendor

Correct Answer: BCD
Section: (none)
Explanation

Explanation/Reference:

QUESTION 61
A customer complaint to be recorded in the following ways (more than one answer is true):

A. The "quality assurance" department is notified using the SAP Business Workflow
B. You create a notification with reference to an SD document.
C. You create a notification with reference to a purchase document.
D. You enter a general description of the problem and save the notification.

Correct Answer: AB
Section: (none)
Explanation

Explanation/Reference:

QUESTION 62
The maintenance strategy can be time-based but cannot be performance-based.

A. Correct
B. Incorrect

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 63
The code groups and codes are maintained in multiple transaction.

A. Correct
B. Incorrect

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 64
Which processing stage refers to "Stock posting completed"?

A. SPCD
B. SPCL
C. SPCO
D. SPST

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 65
During inspection planning, you cannot access different master data.

A. Incorrect
B. Correct

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 66

Which statements are correct? (More than one answer is true.)

A. An inspection lot can be created automatically or manually.
B. Results recording cannot be carried out after the sample size has been determined.
C. When the indicator "QM procurement active" is set, quality management in procurement is activated for all plants of a client.
D. Details for the QM specific procurement processes as plant level are determined using the QM control key.

Correct Answer: AD
Section: (none)
Explanation

Explanation/Reference:

QUESTION 67

You can monitor the receipt of a quality certificate with and without inspection lot processing, independently of the time of goods receipt.

A. Correct
B. Incorrect

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 68

You can assign follow-up actions to the codes in the code groups of the task catalog.

A. Incorrect
B. Correct

Correct Answer: B

QUESTION 69
The following inspection lots cannot be selected: inspection lots with inspection point processing, SD inspection lots with partial lots, and inspection lots that require a digital signature.

A. Incorrect
B. Correct

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 70
In warehouse management, the goods receipt inspection is processed using inventory management. The system creates a quant on the interface and, depending on the system settings, creates a transfer requirement in WM.

A. Incorrect
B. Correct

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 71
Which statements are correct? (More than one answer is true.)

A. An inspection method can also be directly created in a task list.
B. Documents can be assigned to an inspection method.

C. Code groups and codes from one catalog type can be grouped together in selected sets.

D. Codes from selected sets can be used for results recording.

E. No code groups from catalogs can be assigned to an inspection method.

Correct Answer: ABC
Section: (none)
Explanation

Explanation/Reference:

QUESTION 72
You can transfer data from the internal problem notification to the external notification.

A. Correct
B. Incorrect

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 73
Activity: Which statement is correct?

A. Work that was carried out for a notification.
B. Work that is planned for a notification.

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 74
Which statements are correct for QM in Information Management? (More than one answer is true.)

A. If the predefined critical tolerances are not exceeded, the system can automatically trigger follow-up actions.

B. You can compare the data with preplanned scores.

C. You can also define your own analyses based on characteristics and scores.

D. The data in the Information System is updated continuously with results of the standard and event-controlled processes.

E. The ECM in the Quality Information System (QMIS) allows you to monitor critical values.

Correct Answer: BCD
Section: (none)
Explanation

Explanation/Reference:

QUESTION 75
SAP xApps (Composite Applications).

A. Groups all cross-industry business applications.

B. Allow you to integrate various systems into one user interface.

C. It is the technological infrastructure for all SAP applications.

D. All are true.

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 76
Codes from different code groups within the same catalog type can be grouped together in selected sets.

A. Incorrect

B. Correct

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
QUESTION 77
The standard workflow processes in the notifications area are always active.

A. Incorrect
B. Correct

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 78
Which statements are correct? (More than one answer is true.)

A. The basic data cannot be maintained in other recording views (for example, the purchasing view). As a result, this data may already be maintained.
B. The procurement data affects the ordering transaction.
C. The inspection setup specifies, if and how a material is to be inspected.
D. QM-specific data must be maintained at plant level.

Correct Answer: BC
Section: (none)
Explanation

Explanation/Reference:

QUESTION 79
You can edit individual operations from various task lists in your worklist without exiting the transaction.

A. Incorrect
B. Correct

Correct Answer: B
