QUESTION 8

Exhibit.

```
---
- name: Load and commit configuration
  hosts: R1
  roles:
    - Juniper.junos
  connection: local
  gather_facts: no

  tasks:
    - name: Load configuration and commit
      juniper_junos_config:
        load: "merge"
        src: "build_conf/{{ inventory_hostname }}/junos.conf"
      register: response
    - name: Print the response
      debug:
        var: response
```

Referring to the exhibit, where would the junos. conf file be found?

- A. a directory located on R1
- B. a directory on juniper__}uno3_conf
- C. a local directory on the Ansible control machine
- D. a directory on the device list in inventory_hostname

Correct Answer: C

QUESTION 13

Which Python code block is an example of an context manager?

- A.

```
while True:
    device = Device(host="vmx-1", user="lab", passwd="lab123")
    ...
```
- B.

```
try:
    device = Device(host="vmx-1", user="lab", passwd="lab123")
    ...
```
- C.

```
with Device(host="vmx-1", user="lab", passwd="lab123") as device:
    ...
```

```
D. for host in ["vmx-1", "vmx-2"]:
    device = Device(host=host, user="lab", passwd="lab123")
    ...
```

Correct Answer: A

Section: (none)
