## Exam A

### QUESTION 1

When personal privacy information is violated or leaked How to deal with the adoption of self-help measures?

- A. Require the infringer to stop the infringement.
- B. Obtain privacy information of infringers and warn them.
- C. Call the police and ask the public security authorities to deal with it.
- D. Filing a lawsuit in the people's court.

**Correct Answer:** ACD

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

### QUESTION 2

According to the requirements of Graded Protection 2.0, the scope of security audits should cover not only every operating system user on the server, but also which of the following

- A. Database user
- B. Monitor users
- C. Configure the user
- D. Non-admin users

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

www.VCEplus.io

### QUESTION 3

Databases often store important information about the enterprise, and hackers try to gain profits by destroying servers and databases Therefore. Securing databases is becoming increasingly important. Which of the following are common database political methods?

- A. ASQL injection
- B. Privilege elevation
- C. Eliminate unpatched database vulnerabilities
- D. Steal backed-up (unencrypted) tapes
- E. Brute force weak password or default username and password

**Correct Answer:** ABCDE

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

### QUESTION 4

JDBC is a mechanism for Java applications to talk to various different databases, and ODEC, similar to JDEC, is also an important database access technology.

- A. TRUE
- B. FALSE

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 5**

In the Cloudabric scenario, which of the following ways is the firewall deployed?

- A. One machine deployment
- B. Primary/standby dual-machine images
- C. Dual machine load sharing
- D. Hot standby for both active and standby machines

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 6**

Which of the following options is not included in the data theft phase of HiSec Insight?

- A. Ping Tunnel detection
- B. DNS Tunnel detection
- C. Traffic base anomaly detection
- D. Web anomaly detection

**Correct Answer:** ABD

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 7**

When Hisec Insight is linked with terminals, it is mainly linked with the EDR of third-party vendors with cooperative relationships.

- A. TRUE
- B. FALSE

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 8**

Regarding situational awareness, is the following description correct?

- A. Perception of elements in the environment
- B. Rationale for the current situation
- C. A projection of a longer period of time in the future
- D. Perception of elements in a temporal and spatial environment An understanding of their meaning, and a projection of their later state

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### QUESTION 9

The main role of the audit system is to audit security events after the fact To provide sufficient evidence, a security audit product must have which of the following features?

- A. Protect the security of user communications and the integrity of data, and prevent malicious users from intercepting and tampering with data It can fully protect users from malicious damage during operation
- B. It can provide fine-grained access control to maximize the security of user resources
- C. It provides centralized management of all server and network device accounts, which can complete the monitoring and management of the entire life cycle of the account
- D. It can automatically display the user's operation process and monitor the user's every behavior Determine whether the user's behavior poses a danger to the internal network security of the enterprise

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### QUESTION 10

On the principle of defense against trapping Which of the following is described as incorrect?

- A. By deceiving network detection activities, fake resources are displayed, so that attackers cannot discover real system information and vulnerabilities
- B. Interact with the attack campaign to confirm the intent and discover the attacker before the breach occurs
- C. Trapping systems discover and block attacker attacks
- D. Interference Attack Gathering System Information diaphragmatic weakness determination" process, inducing the attacker to expose the intention

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### QUESTION 11

Which of the following does HiSec Insight's big data processing not include?

- A. Data preprocessing
- B. Flow data collection
- C. Distributed storage
- D. Distributed indexes

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

#### QUESTION 12

Multi-factor authentication is mainly used in scenarios of login protection and operation protection.

- A. TRUE
- B. FALSE

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 13**

When there is a large amount of data (such as photos, videos or database files, etc.) that need to be added and unsealed, the user can encrypt and decrypt the data by encrypting the data with the number of watermarks, and the data can be encrypted and decrypted without transmitting a large amount of data over the network

- A. TRUE
- B. FALSE

**Correct Answer:** B  
**Section:** (none)  
**Explanation**

**Explanation/Reference:**  
Explanation:

**QUESTION 14**

Which of the following features can be used for operation auditing of HUAWEI CLOUD bastion hosts?

- A. report analysis
- B. Double License
- C. Work order management
- D. Action playback

**Correct Answer:** ACD  
**Section:** (none)  
**Explanation**

**Explanation/Reference:**  
Explanation:

**QUESTION 15**

When a user terminates the use of HUAWEI CLOUD services, as a service provider, we should ensure the security of user data operations.

- A. Transmission security
- B. Storage security
- C. Destroy security
- D. Collect security

**Correct Answer:** C  
**Section:** (none)  
**Explanation**

**Explanation/Reference:**  
Explanation:

**QUESTION 16**

After you deploy HUAWEI CLOUD WAF Traffic to the tenant's Neb server is sent directly to the origin server Cloud WAF intercepts and detects traffic whose destination IP address is the IP address of the origin server.

- A. TRUE
- B. FALSE

**Correct Answer:** B  
**Section:** (none)  
**Explanation**

**Explanation/Reference:**  
Explanation:

**QUESTION 17**

Which of the following services are security management services in HUAWEI CLOUD solutions?

- A. DDOS Anti-DDoS Pro IP services
- B. Situational awareness services
- C. SSL certificate management service
- D. Security Expert Services

**Correct Answer:** ABCD

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 18**

The purpose of access control is to provide access to authorized subjects and prevent any unauthorized and intentional access.

- A. TRUE
- B. FALSE

**Correct Answer:** A

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 19**

When USG Firewall sends logs outward, it supports several different log information encapsulation formats Which of the following items is a supported firewall format?

- A. Netflow format
- B. Dataflow format
- C. Binary format
- D. Syslog format

**Correct Answer:** ACD

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 20**

USG firewall's DDoS attack prevention techniques include which of the following?

- A. Current limiting technology
- B. Cryptography
- C. Fingerprint technology
- D. Source detection technology

**Correct Answer:** ACD

**Section: (none)**

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 21**

By default, the firewall authenticates traffic that passes through itself.

- A. TRUE
- B. FALSE

**Correct Answer:** B  
**Section:** (none)  
**Explanation**

**Explanation/Reference:**  
Explanation:

#### QUESTION 22

There are many firewall security policies in the data center network, and the administrator enables the policy backup acceleration function, and the source address matching conditions of the security policy are modified It can be effective immediately.

- A. TRUE
- B. FALSE

**Correct Answer:** B  
**Section:** (none)  
**Explanation**

**Explanation/Reference:**  
Explanation:

#### QUESTION 23

If a user queries the security log of the AD server using single sign-on through the firewall, the firewall can immediately take the user offline after the user logs out.

- A. TRUE
- B. FALSE

**Correct Answer:** B  
**Section:** (none)  
**Explanation**

**Explanation/Reference:**  
Explanation:

#### QUESTION 24

If the database O&M workload is much greater than the host O&M workload, you can choose to have an independent department outside the original O&M bastion host The database bastion host.

- A. TRUE
- B. FALSE

**Correct Answer:** A  
**Section:** (none)  
**Explanation**

**Explanation/Reference:**  
Explanation:

#### QUESTION 25

With the following description of the load balancing feature of USG Firewall Server, what are the correct items?

- A. The IP address specified in the security policy should be the IP address of the real server
- B. The IP address specified in the security policy should be the IP address of the virtual server
- C. Modifying the destination IP address and destination port number of a packet occurs after querying the inter-domain security policy
- D. Modifying the destination IP address and destination port number occurs before querying the inter-domain security policy

**Correct Answer:** AD  
**Section:** (none)

Explanation

Explanation/Reference:  
Explanation:

QUESTION 26

Control of ping packets to the USG firewall itself The access control management function of the interface takes precedence over the security policy.

- A. TRUE
- B. FALSE

Correct Answer: A  
Section: (none)  
Explanation

Explanation/Reference:  
Explanation:

QUESTION 27

Which is the more correct number of DNS servers that can be bound to each outbound interface in the USC Firewall DNS Transparent Proxy function?

- A. 2
- B. 3
- C. 4
- D. 1

Correct Answer: A  
Section: (none)  
Explanation

Explanation/Reference:  
Explanation:

QUESTION 28

A description of the following IPv6 Secure Neighbor Discovery feature information for one of the interfaces Which one is wrong?

```
<FN> display ipv6 security interface 10ge 1/0/1
(L): Link local address
SEND: Security ND
SEND information for the interface : 10GE1/0/1
+-----+
| IPv6 address | PrefixLength | Collision Count |
+-----+-----+-----+
| 2001::209F:2FTB:DCF2:F28C | 64 | 0 |
+-----+-----+-----+
SEND sec value :1
SENDsecurity modifier value :C70D :F872:5AF8:CFB4:8D67:3E30:8594:2626
SEND RSA key label bound :Huawei
SEND NDminiman key length value :512
SEND NDnaxinrun key length value : 2048
SEND ND Timestanp delta value : 300
SEND ND Timestanp fuzz value :1
SEND ND Timestap drift value :1
SEND ND fully secured mode :enable
```

- A. The minimum key length that the interface can accept is 512
- B. The maximum key length that the interface can accept is 2048
- C. The interface does not have strict security mode enabled
- D. The security level of the CGA address is 1

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 29**

In the following description of the USG firewall security policy, which one is wrong?

- A. When the firewall is equipped with the undo firewall packet-filter basic-protocol enable command, unicast packets are not controlled by security policies
- B. By default... Broadcast packets are not controlled by security policies
- C. In the case of the province, multicast packets are not controlled by security policies
- D. By default... Unicast packets are controlled by security policies

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:

**QUESTION 30**

The USG firewall is connected to the corporate intranet through a router After the firewall is configured with the cross-Layer 3 MAC identification feature, then the security policy of the firewall can configure the MAC address as a match condition o

- A. TRUE
- B. FALSE

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Explanation:
