

IBM.C1000-123.by.rian.32q

Number: C1000-123

Passing Score: 800

Time Limit: 120

File Version: 4.0

**Exam Code: C1000-123**

**Exam Name: IBM Robotic Process Automation v20.12.x Developer**

## **Exam A**

### **QUESTION 1**

What does establishing a public and private key pairing in the Credentials section of the Tenant configuration mean?

- A. Any user will be able to log into the Web Portal as needed.
- B. Computers having the public key will be able to connect to the server.
- C. IBM RPA Studio will be able to connect to the server.
- D. Any robot running on the computer that has the private key has access to that Tenants vault credential.

**Correct Answer: D**

**Section:**

### **QUESTION 2**

What are the differences when using the IBM RPA Recorder on SAP versus on a Windows application?

- A. The highlighted color of the selector control is different between a Windows-based application and SAP.
- B. To identify the selector of a control, the developer needs to hold down Alternative key for Windows and Control key for SAP.
- C. Developers need to click to identify control selector in SAP while this is not required for Windows applications.
- D. SAP automation requires activating the vision driver in Recorder while control can be directly identified for a Windows application.

**Correct Answer: A**

**Section:**

### **QUESTION 3**

Why does on premise RPA allow the creation of multiple tenants?

- A. To lease server space to tenants
- B. To license tenancies to different companies
- C. To create isolated RPA environments for different parts of the business
- D. To create separate development/test/production environments
- E. To enable parallel processing

**Correct Answer: B**

**Section:**

### **QUESTION 4**

What is the main function of a chat mapping?

- A. To map a knowledge base to a chatbot implementation
- B. To expose and integrate a chatbot to different channel applications
- C. To map automation logic to an external chat service

D. To connect a chatbot with IBM Watson Assistant service

**Correct Answer: C**

**Section:**

#### **QUESTION 5**

A customer has five runtime bot licenses. They plan to run many long-running bots that are CPU intensive What would be the most sensible deployment for these licenses?

- A. Deploy one Windows VM and allocate all five runtime licenses to it.
- B. Deploy one Windows VM and allocate one runtime license to it.
- C. Deploy five Windows VMs and allocate one runtime license for each VM.
- D. Deploy all five licenses on an IBM Z Series Mainframe.

**Correct Answer: B**

**Section:**

#### **QUESTION 6**

What are two valid options to see the logs for scheduled bot execution?

- A. Under the Scripts menu in the Web Client selecting the scheduled script and accessing the Logs tab
- B. Via Schedules menu in Web Client, selecting the scheduled script and searching for execution data
- C. Accessing the logs from agent computer <IBM RPA installation folder>\execution\_logs -folder
- D. Using Dashboard datasource LOGS
- E. Reading logs from the System.Logs queue

**Correct Answer: B, D**

**Section:**

#### **QUESTION 7**

What is the purpose of the command Ask Grammar used in IVR Bot?

- A. To check if the grammar from the input user response is correct
- B. To identify the sentence structure of the user response based on input grammar file
- C. To perform a spell check on the user response and return the corrected text
- D. To extract the intention from the user response based on input grammar file

**Correct Answer: A**

**Section:**

#### **QUESTION 8**

Which command is used to remove a specific item from a list?

- A. Remove Value
- B. Enqueue
- C. Delete Item

D. Pop

**Correct Answer: D**  
**Section:**

**QUESTION 9**

Where would one build a new process, define its SLA and input queue?

- A. IBM Business Automation Workflow
- B. IBM RPA Studio
- C. MS Designer Studio
- D. IBM RPA Webclient

**Correct Answer: A**  
**Section:**

**QUESTION 10**

How does a user start the launcher application?

- A. Bot Portal UI
- B. Windows Desktop/Start Menu
- C. Windows Task Scheduler
- D. Webclient in the launcher menu

**Correct Answer: C**  
**Section:**

**QUESTION 11**

In the IBM RPA Studio, which view mode is best used to perform drag and drop commands?

- A. Debug
- B. Designer
- C. Call Graph
- D. Script

**Correct Answer: B**  
**Section:**

**QUESTION 12**

When a schedule is executed, what is the first thing that happens?

- A. RPA server unlocks the agent computer.
- B. The agent loads the script from local storage.
- C. RPA server sends an execution command to the agent.
- D. The agent requests the scheduled bot script from the RPA server.

**Correct Answer: C**

**Section:**

**QUESTION 13**

When does the Handle Error command start capturing all errors?

- A. In the subroutine being called
- B. Before the command is executed
- C. The Handle Error only sets up the Stop Execution command
- D. As soon as it is executed

**Correct Answer: C**

**Section:**

**QUESTION 14**

How can script variables be seen in designer mode?

- A. Switch to the Call Graph.
- B. Press the F5 key in Designer mode.
- C. They cannot be seen in designer mode.
- D. Click on the Variables Visible button on the Home Ribbon.

**Correct Answer: B**

**Section:**

**QUESTION 15**

Which menu allows the addition of measures and dimensions and configure settings related to the selected data item in a dashboard?

- A. Pie Chart Config Menu
- B. Data item menu
- C. Legend menu
- D. Datasource menu

**Correct Answer: B**

**Section:**

**QUESTION 16**

In order to use the available parameter commands, where must the parameter first be created?

- A. Defined as a variable in a subroutine so that it can be referenced
- B. In the same script so that it can be referenced
- C. In the Web Portal
- D. Another script so that it can be referenced

**Correct Answer: A**

**Section:**

**QUESTION 17**

Which command combination is best used to ensure that a Robot cannot interact with an application (blocks hardware) until the application is fully loaded?

- A. Attach Window
- B. Type Text
- C. Block Input
- D. Mouse Command
- E. Unblock Entry

**Correct Answer: A**

**Section:**

**QUESTION 18**

When registering a client computer manually to IBM RPA tenant, which two information fields are mandatory to set?

- A. Name
- B. VNC address
- C. Computer credential
- D. Computer type
- E. Physical address

**Correct Answer: C**

**Section:**

**QUESTION 19**

Which statement is true for IBM RPA Dashboards?

- A. To create dashboards, custom data sources must be defined.
- B. Filtering is not available for counters.
- C. A dashboard can just use one of the available data sources.
- D. Dashboards can have several tabs to display various types of charts.

**Correct Answer: D**

**Section:**

**QUESTION 20**

What is the purpose of a subroutine?

- A. To perform a task using a sequence of commands only once
- B. To run a sequence of commands that can be reused at any time
- C. To keep similar scripts together
- D. To process any errors that might arise

**Correct Answer: A**

**Section:**

**QUESTION 21**

What is a Group in an IBM RPA web client setting?

- A. Group refers to user role which is defined as super-administrator, administrator or normal user.
- B. Group refers to a set of users or computers utilizing the same attended bot launcher.
- C. Group refers to a set users, or computers, or both that can be set up in web client.
- D. Group refers to job title of users which is set up during creation of each new user.

**Correct Answer: D**

**Section:**

**QUESTION 22**

In IBM RPA, what are exceptions best defined as?

- A. Unexpected errors that occur during the execution of a script
- B. Stop in processing because the vault is not open
- C. Commands that are not properly completed in the IBM RPA Studio
- D. IBM RPA scripts that stop because the servers runs out of memory

**Correct Answer: D**

**Section:**

**QUESTION 23**

Which information can be seen in the user management screen in the IBM RPA web client?

- A. Language preference
- B. User name
- C. Group
- D. Administrator (yes/no)
- E. Date and time of last log in

**Correct Answer: A**

**Section:**

**QUESTION 24**

What is needed in order to get a queue previously created on the web client?

- A. Adding the parameter --fromconfiguration
- B. Adding the parameter ---priority 1
- C. Registering the enqueued time in the web client
- D. Registering the queue with the Java Message Provider

**Correct Answer: D**

**Section:**

**QUESTION 25**

What is the correct menu to access Knowledge Base Training in IBM RPA Studio?

- A. Home
- B. Tools
- C. File
- D. Options

**Correct Answer: B**

**Section:**

**QUESTION 26**

When configuring a launcher, what must be configured to execute the scripts?

- A. Windows EXE
- B. Define REST URL
- C. Define a link to a script
- D. Configure a button that points to a script

**Correct Answer: D**

**Section:**

**QUESTION 27**

Which statement about knowledge base creation in IBM RPA is correct?

- A. Knowledge base can be created from scratch in Studio using Knowledge Base Builder function.
- B. Knowledge base can be created in excel (.xlsx) based on a pre-defined format and then uploaded to server from Studio.
- C. Knowledge base file can be created and published from Web Client.
- D. Knowledge base can only be created by administrators.

**Correct Answer: A**

**Section:**

**QUESTION 28**

What are the valid inputs for the Click on Web Page command?

- A. Hold time
- B. No-Wait
- C. Double-click
- D. Right-click
- E. Image Id

**Correct Answer: C**

**Section:**

**QUESTION 29**

When installing the on premise client for SaaS, which two parameters are required for the License check?

- A. License code
- B. Tenant Code
- C. The URL to the on-premises server API
- D. Company
- E. Email

**Correct Answer: D**

**Section:**

**QUESTION 30**

After successfully installing the client, the license page shows: Runtime:  
What does this mean?

- A. The client has been allocated one out of a total of three run time licenses.
- B. The client has been allocated one out of three cores.
- C. One bot has run and two are remaining.
- D. There are three run time licenses available and one bot is consuming one of these licenses.

**Correct Answer: C**

**Section:**

**QUESTION 31**

What is a valid text manipulation command?

- A. Search and Replace Text
- B. Unformat Text
- C. Duplicate Text
- D. Replace Text

**Correct Answer: D**

**Section:**

**QUESTION 32**

What is the software environment that IBM RPA is based on?

- A. Microsoft .NET
- B. Java
- C. Node.js
- D. Python

Correct Answer: A  
Section:
