

**Exam Code: HPE0-V25**

**Exam Name: HPE Hybrid Cloud Solutions**

Exam A

QUESTION 1

DRAG DROP

Match the RAID level with its capacity overhead. (Each option may be used once, more than once, or not at all.)

Select and Place:

Capacity of one drive

Capacity of two drives

Zero overhead from capacity prospective

Answer Area

RAID 1

RAID 0

RAID 5

RAID 6

Correct Answer:

Capacity of one drive

Capacity of two drives

Zero overhead from capacity prospective

Answer Area

Capacity of one drive

Zero overhead from capacity prospective

Capacity of one drive

Capacity of two drives

RAID 1

RAID 0

RAID 5

RAID 6

Section:

Explanation:

QUESTION 2

DRAG DROP

Match the preconfigured HPE workload Profile With Its definition.

Profile		Definition
General power efficient compute		This is a default out-of-the-box profile that uses the most common performance settings seen across most application workloads
IO throughput		This profile setting will ensure that all available virtualization technologies are enabled and configured for maximum performance.
Graphics processing		It is intended for configurations that depend on maximum throughput between IO and memory.
Virtualization —Max Performance		This profile is intended for configurations that use GPUs and depend on maximum bandwidth between IO and memory.

Answer:

Profile		Definition
General power efficient compute	General power efficient compute	This is a default out-of-the-box profile that uses the most common performance settings seen across most application workloads
IO throughput	Virtualization —Max Performance	This profile setting will ensure that all available virtualization technologies are enabled and configured for maximum performance.
Graphics processing	IO throughput	It is intended for configurations that depend on maximum throughput between IO and memory.
Virtualization —Max Performance	Graphics processing	This profile is intended for configurations that use GPUs and depend on maximum bandwidth between IO and memory.

Select and Place:

Profile	Definition
General power efficient compute	This is a default out-of-the-box profile that uses the most common performance settings seen across most application workloads
IO throughput	This profile setting will ensure that all available virtualization technologies are enabled and configured for maximum performance.
Graphics processing	It is intended for configurations that depend on maximum throughput between IO and memory.
Virtualization —Max Performance	This profile is intended for configurations that use GPUs and depend on maximum bandwidth between IO and memory.

Correct Answer:

Profile	Definition
General power efficient compute	This is a default out-of-the-box profile that uses the most common performance settings seen across most application workloads
Virtualization —Max Performance	This profile setting will ensure that all available virtualization technologies are enabled and configured for maximum performance.
IO throughput	It is intended for configurations that depend on maximum throughput between IO and memory.
Graphics processing	This profile is intended for configurations that use GPUs and depend on maximum bandwidth between IO and memory.

Section:

Explanation:

### QUESTION 3

Which combination of HPE solutions can provide data validation on MSL3040 and LTO-9 cartridges?

- A. HPE Command View for Tape Libraries and HPE TapeAssure Advanced
- B. Library and Tape Tools and HPF StoreEver TapeAssure Advanced Software
- C. HPE Command View for Tape Libraries and HPE StoreEver Data Verification
- D. HPE Command View for Tape Libraries and Library and Tape Tools

Correct Answer: B

**Section:****Explanation:**

Library and Tape Tools and HPF StoreEver TapeAssure Advanced Software: This combination is incorrect, as Library and Tape Tools (L&TT) is a diagnostic tool that allows you to perform firmware upgrades, run tests, and verify data on tape devices. HPE StoreEver TapeAssure Advanced Software is a software that provides data integrity, performance, health, and utilization reports for tape drives and cartridges, and it works with L&TT to perform data verification<sup>2</sup>.

**QUESTION 4**

Which license is needed in an HPE SimpliVity environment where automata disaster recovery capabilities are required?

- A. Veeam Backup & Replication
- B. VMware Site Recovery Manager
- C. HPE Peer Persistence
- D. HPE RapidDR

**Correct Answer: D**

**Section:****Explanation:**

HPE RapidDR: This license is incorrect, as HPE RapidDR is a disaster recovery orchestration tool that automates the failover of a pre-configured set of virtual machines from a production site to a recovery site on HPE SimpliVity. It leverages the built-in backup and replication capabilities of HPE SimpliVity and simplifies the disaster recovery process.

HPE SimpliVity is a hyperconverged infrastructure solution that combines compute, storage, networking, and data services in a single platform. It provides high performance, efficiency, and resiliency for various workloads, including edge, VDI, and general virtualization<sup>1</sup>.

**QUESTION 5**

Your customer needs to accelerate the performance of their DL380 Gen10 servers running workloads on more active cores at higher clock frequencies. The customer wants to know if Core Boosting will help. What advice should you provide?

- A. It is only supported on ProLiant DL Gen11 servers.
- B. It is a software solution and has performance limitations.
- C. It is only supported on certain Intel processors.
- D. It is an AMD technology so it is unavailable to them

**Correct Answer: C**

**Section:****Explanation:**

Core Boosting technology uses a relaxed and optimized turbo profile that adapts the processor to specific use cases, configurations, and environments. Core Boosting processors take advantage of extra server power and thermal headroom provided by an innovative HPE voltage regulator design and by cooling technologies. Consequently, systems that have Core Boosting processors can alleviate common setbacks and maximize processor computing power.

However, Core Boosting option is only supported in ProLiant Gen10 servers with certain Intel processors<sup>1</sup>. The HPE ProLiant DL380 Gen10 server data sheet<sup>2</sup> lists the supported processors for Core Boosting as:

Intel Xeon Gold 6148 Processor (20 core, 2.4 GHz, 27.5 MB L3 cache)

Intel Xeon Gold 6154 Processor (18 core, 3.0 GHz, 24.75 MB L3 cache)

Intel Xeon Gold 6152 Processor (22 core, 2.1 GHz, 30.25 MB L3 cache)

Intel Xeon Platinum 8168 Processor (24 core, 2.7 GHz, 33 MB L3 cache)

Therefore, if your customer's DL380 Gen10 servers are running workloads on more active cores at higher clock frequencies, they can benefit from Core Boosting technology if they have one of these supported Intel processors.

**QUESTION 6**

You need a tool on a SAN Fabric that will deliver protocol diagnostic, fabric configuration validation with SPOCK, and assess the health of physical ports with self-healing and fabric monitoring.

It must perform end-to-end diagnostics while using predefined templates to reduce configuration errors.

Which diagnostic tool should be used?

- A. HPE InfoSight
- B. On-Line Diagnostics
- C. Off-Line Diagnostics
- D. Network Orchestrator

**Correct Answer: A**

**Section:**

**Explanation:**

According to the HPE website, HPE InfoSight is a cloud-based AI platform that delivers global visibility and insights into the health, performance, and capacity of your HPE storage and servers. It can also provide protocol diagnostics, configuration validation with SPOCK, and assess the health of physical ports with self-healing and fabric monitoring<sup>1</sup>. It can also perform end-to-end diagnostics while using predefined templates to reduce configuration errors<sup>1</sup>.

#### QUESTION 7

your customer is using HPE Infosight in their environment containing ProLiant and MSA systems.  
which product supports automatic case creation through InfoSight?

- A. ProLiant DL120 G7
- B. MSA 2062
- C. MSA2040
- D. proLiant DL560 Gen10

**Correct Answer: B**

**Section:**

**Explanation:**

According to the HPE website, HPE InfoSight supports automatic case creation for HPE ProLiant servers that are connected to HPE InfoSight through HPE Integrated Lights-Out (iLO) Amplifier Pack<sup>1</sup>. The ProLiant DL560 Gen10 is one of the supported servers that can benefit from this feature<sup>1</sup>.

#### QUESTION 8

your customer needs to capture, store, manage, and analyze a dataset that exceeds capacity of typical database software tools.  
What storage technology should you propose to meet their needs?

- A. Block Storage
- B. Containers
- C. Big Data
- D. File Storage

**Correct Answer: C**

**Section:**

**Explanation:**

According to Simplilearn, big data storage is a new technology that allows you to store large amounts of data that exceed the capacity of typical database software tools<sup>1</sup>. Big data storage can handle various types of data, such as structured, unstructured, or semi-structured data, and provide fast and scalable access to it<sup>1</sup>.

#### QUESTION 9

What does an SSD wear Gauge define?

- A. Remaining lifetime for the SSD drive

- B. Type of technology used within the SSD drive
- C. Type of interface used for the SSD drive
- D. Maximum speed of the SSD drive

**Correct Answer: B**

**Section:**

**Explanation:**

According to HPE, SmartSSD Wear Gauge is a feature that provides an estimate of the remaining useful life of an SSD drive based on its usage patterns<sup>1</sup>. It can help you monitor the health and performance of your SSD drives and plan for replacement or upgrade when needed<sup>1</sup>.

#### QUESTION 10

Your customer is interested in the new MSA storage array and asks for a demo of the features and monitoring capabilities. Which tool should you use?

- A. HPE Storage Management Utility (SMU)
- B. HPE Data Services Cloud console (DSCC)
- C. HPE StoreServ Management console (SSMC)
- D. HPE InfoSight

**Correct Answer: A**

**Section:**

**Explanation:**

According to HPE, SMU is a web-based interface that enables you to configure, monitor, and manage storage devices. It also provides performance monitoring and reporting for HPE MSA storage arrays<sup>1</sup>. With SMU, you can demonstrate the features and monitoring capabilities of the new MSA storage array to your customer.

#### QUESTION 11

Your customer wants to update the firmware for multiple HPE ProLiant MicroServer Gen10 Plus servers. Which tool must be used?

- A. HPE Composer
- B. HPE Data Services Cloud console
- C. HPE iLO 5
- D. HPE GreenLake central

**Correct Answer: C**

**Section:**

**Explanation:**

According to HPE, iLO 5 is a remote management solution that enables you to configure, monitor, and update your HPE servers seamlessly from anywhere in the world<sup>1</sup>. It also provides firmware update capabilities for HPE ProLiant MicroServer Gen10 Plus servers<sup>2</sup>. With iLO 5, you can demonstrate how to update the firmware for multiple servers easily and securely.

#### QUESTION 12

Your customer has multiple, remote sales offices with one HPE ProLiant server deployed per site to run local IT services. They want to centralize the monitoring and lifecycle management of these servers using a cloud-based offering.

Which tool would demonstrate this functionality?

- A. HPE CloudPhysics
- B. HPE GreenLake Compute Ops Management
- C. HPE GreenLake Data Services Cloud Console

D. HPE InoSight

**Correct Answer: D**

**Section:**

**Explanation:**

According to HPE, HPE InfoSight is a cloud-based AI platform that delivers global visibility and insights into the health, performance, and capacity of your HPE storage and servers. It can also centralize the monitoring and lifecycle management of multiple HPE ProLiant servers deployed in remote sites using a single dashboard<sup>1</sup>. With HPE InfoSight, you can demonstrate how to simplify and optimize your customer's IT operations from edge to cloud.

**QUESTION 13**

Your customer needs to consolidate data and add additional block-based storage to their main document management application. They have five standalone servers with 10Gb networking. Which storage technology should you recommend?

- A. Network File System
- B. Storage Area
- C. Direct Attached
- D. Network Attached Storage

**Correct Answer: B**

**Section:**

**Explanation:**

According to IBM, a SAN is a dedicated network that provides access to consolidated, block-level data storage<sup>1</sup>. A SAN allows multiple servers to access shared pools of storage devices, such as disk arrays or tape libraries<sup>1</sup>. A SAN can help your customer consolidate data and add additional block-based storage to their main document management application.

**QUESTION 14**

DRAG DROP

Match the HPE storage products to their use case.

**Select and Place:**

Product		Use Case
HPE MSA2062		Provides storage for two HPE ProLiant DL380 Gen10 servers in a branch office
HPE SimpliVity		Secures backup data with an air-gap separation
HPE StoreEver LTO-9 Ultrium 45000 External Tape Drive		Enterprise HCI with integrated compute, storage, and data protection
HPE StoreOnce 3660		Provides a disk-based backup functionality with efficient deduplication

**Correct Answer:**

## Product

HPE MSA2062	
HPE StoreEver LTO-9 Ultrium 45000 External Tape Drive	
HPE SimpliVity	
HPE StoreOnce 3660	

## Use Case

Provides storage for two HPE ProLiant DL380 Gen10 servers in a branch office

Secures backup data with an air-gap separation

Enterprise HCI with integrated compute, storage, and data protection

Provides a disk-based backup functionality with efficient deduplication

Section:

Explanation:

### QUESTION 15

your customer has standardized on the AMD platform and asks for a new HPE server. Which server should you recommend?

- A. DL365
- B. DL360
- C. DL385
- D. DL560

Correct Answer: C

Section:

Explanation:

According to HPE, this server offers the 2nd generation AMD EPYC 7000 Series processor delivering up to 2X the performance of the prior generation<sup>1</sup>. It also provides built-in security and flexibility for key applications such as virtualization, software-defined storage (SDS), and High-Performance Compute (HPC)<sup>1</sup>.

### QUESTION 16

your customer has an existing MSA 2060 with 20 SAS drives. They want to enhance the performance by adding SSD drives in the four remaining slots. What mandatory option must be sold with the four SSD drives?

- A. HPE Advanced Data services suite license
- B. HPE PointNext Advisory & professional services
- C. HPE MSA Health Check Tool
- D. HPE Data Services Cloud Console subscription

Correct Answer: A

Section:

Explanation:

According to HPE, this license enables advanced features such as performance tiering and RAID tier affinity for HPE MSA 2060 storage arrays<sup>1</sup>. These features can help enhance the performance of SSD drives by automatically moving hot data to faster drives and keeping data on the same RAID group<sup>1</sup>.

**QUESTION 17**

You are considering requirements for a database server.  
What is the most important component to employ?

- A. File and Print software
- B. GPU accelerators
- C. Antivirus Software
- D. Fault-tolerant memory

**Correct Answer: D**

**Section:**

**Explanation:**

According to Database Design Resource, fault-tolerant memory is a type of memory that can detect and correct errors without affecting the performance or availability of the database server1.Fault-tolerant memory can help prevent data corruption and loss, which are critical issues for database servers1.

**QUESTION 18**

DRAG DROP

Map the HPE platform and workload-oriented solutions with the customer's challenge.

**Select and Place:**

Solution	Challenge
Containers solutions	Unify operations and management
Data Management and Analytics solutions	Provide stability to scale anywhere
Hybrid Cloud solutions	Improve user experience while managing costs
Transcoding & Visualization solutions	Accelerate time to value from insights
VDI solutions	Simplify acquisition and deployment of complex systems

**Correct Answer:**

## Solution

## Challenge

Hybrid Cloud solutions		Unify operations and management
Transcoding & Visualization solutions		Provide stability to scale anywhere
VDI solutions		Improve user experience while managing costs
Data Management and Analytics solutions		Accelerate time to value from insights
Containers solutions		Simplify acquisition and deployment of complex systems

### Section:

### Explanation:

### QUESTION 19

you are preparing a proposal to refresh your customers existing OL380 GE and G7 servers With newer generations. Before making a decision, your customer needs to know if a refresh is worth the cost. Which option show the value of the purchase to your customer?

- A. Solution sales Enablement Tool
- B. selective Storage presentation
- C. TCO/ROI Calculator
- D. Smart CID

**Correct Answer: C**

### Section:

### Explanation:

According to HPE, the TCO/ROI Calculator is a tool that helps you compare the total cost of ownership (TCO) and return on investment (ROI) of different server solutions<sup>1</sup>. It can help you demonstrate how a server refresh can reduce costs, improve performance, and increase efficiency for your customer.

### QUESTION 20

your customer wants to purchase a new HPE MSA controller enclosure fully populated With SSD fives. They have four existing expansion enclosures from their previous solution that they want to connect to the new controller.

Two expansion enclosures are fully populated with SFF disks, and the other two are populated with LFF drives. which storage controller enclosure solution should you recommend?

- A. HPF MSA 1060 with Advanced Data Service (ADS) suite LTLJ
- B. HPE MSA 1060
- C. HPF MSA 2060 with Advanced Data service (ADS) suite LTU
- D. HPE MSA 2060

**Correct Answer: C**

### Section:

### Explanation:

HPE MSA 2060 Storage solution supports a mixture of 3.5 inch LFF and 2.5 inch SFF expansion enclosures for a maximum of 9 enclosures (10 total including the array). This means that it can accommodate the four existing expansion enclosures from the previous solution that have different disk sizes.

The HPE MSA 2060 also delivers up to 395,000 IOPS, which is up to 80% faster than its prior generation<sup>1</sup>. This would be beneficial for a customer who wants to fully populate the controller enclosure with SSD drives, which are faster than HDD drives.

The Advanced Data service (ADS) suite LTU is a license that enables features such as snapshot, replication, performance tiering, virtual disk groups, and thin provisioning on the HPE MSA 2060<sup>2</sup>. These features can enhance the performance, availability, and efficiency of the storage system.

#### QUESTION 21

A customer who is new to HPE wants to refresh the hardware infrastructure for their VMware environment. Before meeting the customer, you need to perform an assessment to get a better of their environment  
Which HPE tool should you use?

- A. OneView
- B. CloudPhysics
- C. GreenLake Quick Quote
- D. InfoSight

**Correct Answer: B**

**Section:**

**Explanation:**

CloudPhysics is a tool that provides a comprehensive assessment of VMware environments and helps identify opportunities for optimization and modernization. CloudPhysics can also generate a ready-to-order bill of materials for HPE solutions based on the customer's workload requirements.

The other options do not seem to be suitable for performing an assessment of a VMware environment. OneView is a tool for managing HPE servers, storage, and networking<sup>2</sup>. GreenLake Quick Quote is a tool for creating quotes for HPE GreenLake services<sup>3</sup>. InfoSight is a tool for monitoring and managing HPE storage systems.

#### QUESTION 22

Which new feature is provided by the Storage Management utility v4?

- A. autonomic
- B. automatic file classification
- C. automatic installation of new recommended firmware versions
- D. easy switching of active firmware versions

**Correct Answer: D**

**Section:**

**Explanation:**

one of the topics covered in the module 4 of the Implementing HPE MSA Storage Solutions course is "Explain the firmware update process on MSA". This suggests that the firmware update is a maintenance task that can be performed with the Storage Management utility v4.

#### QUESTION 23

your customer has a small once with five employees and needs a tower server tor a File & print workload.  
Which server series should they use?

- A. Apollo Series
- B. ML series
- C. Synergy Series
- D. DL series

**Correct Answer: B**

Section:

QUESTION 24  
DRAG DROP  
Review the Exhibit:

HPE Smart Array P 4 16 ie - m SR Gen10 Controller

Match the definition to each colored boxed acronym from the image.

Select and Place:

Box		Definition
"P"		Class of Raid Controller
"4"		Controller Type (form factor)
"16"		Number of SAS lanes
"ie"		Port Type
"m"		Smart Array Series

Correct Answer:

Box		Definition
"P"		Class of Raid Controller
"m"		Controller Type (form factor)
"4"		Number of SAS lanes
"ie"		Port Type
"16"		Smart Array Series

Section:  
Explanation:

**QUESTION 25**

your customer is looking for a reference architecture from HPE.  
Which tool can translate their requirements a validated configuration?

- A. one config Advanced (OCA)
- B. solution sales Enablement TOOI (SSET)
- C. One Config Simple (OCS)
- D. HPE storage STaTS TOOI

**Correct Answer: B**

**Section:**

**Explanation:**

Solution Sales Enablement Tool (SSET) is a tool that helps you design and validate HPE solutions based on reference architectures. The SSET can translate customer requirements into a validated configuration that meets their needs and budget. The SSET can also generate a bill of materials, a quote, and a proposal for the solution.

**QUESTION 26**

You are troubleshooting a server issue and need to reference a log file tor hardware and configuration changes.  
When log file should you review?

- A. IML - Integrated Management Log
- B. ILO Event Log
- C. HPE OneView Activity Log
- D. AHS - Active Health system

**Correct Answer: D**

**Section:**

**Explanation:**

Active Health System (AHS) is a feature that continuously monitors and records thousands of system parameters and diagnostic telemetry data on HPE ProLiant servers. The AHS log contains information such as hardware and configuration changes, health status, boot issues, and firmware updates. The AHS log can be used for troubleshooting and analysis by HPE support or by the user.

**QUESTION 27**

A customer needs an open-source container orchestration system that supports cloud-native applications area provides support for containers with persistent storage at the same time.  
Which platform should you recommend?

- A. Kubernetes
- B. openstack Neutron
- C. Hadoop
- D. Hortonworks Data Platform

**Correct Answer: A**

**Section:**

**Explanation:**

Kubernetes is an open-source system for automating deployment, scaling, and management of containerized applications. It groups containers that make up an application into logical units for easy management and discovery. Kubernetes supports cloud-native applications that are designed to run on distributed and dynamic environments.

Kubernetes also supports containers with persistent storage by providing various options such as:

Persistent Volumes: These are abstracted storage resources that can be provisioned by administrators and consumed by users without worrying about the underlying storage implementation.

Persistent Volume Claims: These are requests for storage by users that can be dynamically or statically bound to Persistent Volumes.

Storage Classes: These are ways to describe different kinds of storage offered by a cluster, such as SSD or HDD, performance or capacity, etc.

Volume Snapshots: These are point-in-time copies of Persistent Volumes that can be used for backup or restoration purposes.  
 Container Storage Interface: This is a standard interface that allows Kubernetes to communicate with various storage vendors and plugins.

**QUESTION 28**

you need to explain how the HPE GreenLake platform can help your customers business become more agile.  
 What information you provide? (Select two)

- A. customers can control costs Since advanced metering allows them to only pay tor what is used.
- B. The HPE GreenLake platform is always managed by HPE, reducing the need for internal IT staff.
- C. HPE active-ty monitors, manages, and deploys capacity ahead of demand so the customer can scale With ease within an installed buffer
- D. HPE GreenLake provides infinite scale to the customer at no additional cost with its scale up policy.
- E. HPF GreenLake provides a larger hardware portf01i0 than traditional HPE hardware solutions

**Correct Answer: A, C**

**Section:**

**Explanation:**

HPE GreenLake is a cloud services platform that delivers on-demand capacity and planning, combining the agility and economics of the public cloud with the security and performance of on-premises IT. Some of the benefits of HPE GreenLake include:

Customers can control costs since advanced metering allows them to only pay for what is used: HPE GreenLake offers a pay-per-use model that aligns costs with actual usage, reducing overprovisioning and improving cash flow. Customers can also scale up or down as needed and only pay for what they use.

HPE actively monitors, manages, and deploys capacity ahead of demand so the customer can scale with ease within an installed buffer: HPE GreenLake provides customers with buffer capacity that is ready to use in minutes, not months, enabling them to respond quickly to changing business needs. Customers can also access a range of cloud services from HPE and partners through a self-service portal.

**QUESTION 29**

DRAG DROP

Match the protocol to a fundamental approach for storing dat a. (Each option may be used once, more than once, or not at all.)

**Select and Place:**

NAS

SAN

**Answer Area**

Block access using a FC protocol.

Block access using FCoE protocol.

Sharing files over industry standard protocols such as NFSv4 or SMB.

Block access using the iSCSI protocol.

**Correct Answer:**

Answer Area	
NAS	Block access using a FC protocol.
SAN	Block access using FCoE protocol.
NAS	Sharing files over industry standard protocols such as NFSv4 or SMB.
SAN	Block access using the iSCSI protocol.

Section:

Explanation:

### QUESTION 30

DRAG DROP

Match the HPE server models With the appropriate specification.

Select and Place:

Server	Specification
DL20 Gen10 Plus	Flexible and affordable 15" deep server supporting the latest Intel XEON E processors
DL180 Gen10	High-density, four-socket server with high performance, scalability and reliability, all in a 2U chassis for business-critical computing performance
DL345	Secure and cost effective 1P 2U server delivering flexible storage capacity, delivering a high core count, and a large memory footprint
DL560	Secure 2P 2U server delivering world-class compelling performance with the right balance of expandability and scalability

Correct Answer:

## Server

## Specification

DL20 Gen10 Plus		Flexible and affordable 15" deep server supporting the latest Intel XEON E processors
DL345		High-density, four-socket server with high performance, scalability and reliability, all in a 2U chassis for business-critical computing performance
DL180 Gen10		Secure and cost effective 1P 2U server delivering flexible storage capacity, delivering a high core count, and a large memory footprint
DL560		Secure 2P 2U server delivering world-class compelling performance with the right balance of expandability and scalability

**Section:**

**Explanation:**

### QUESTION 31

What is a feature Of the MSA 2060 storage array?

- A. Gains AI and machine learning operational through InfoSight
- B. Encryption can be enabled by adding 2 self-encrypted drives through Full Disk Encryptbn
- C. Supports a mixture Of both SSD and HDDs within the same system
- D. Deduplication and compression are non-intrusive and in-line

**Correct Answer: C**

**Section:**

**Explanation:**

This is because the HPE MSA 2060 Storage solution supports a mixture of 3.5 inch LFF and 2.5 inch SFF expansion enclosures for a maximum of 9 enclosures (10 total including the array).You can start small and scale as needed with any combination of SSDs, Enterprise SAS or MidLine SAS HDDs12.

### QUESTION 32

Over the next two years, your customer Plans to expand from 25 to 75 employees. They currently have limited space in the server rack and will need to purchase additional servers as the business grows.

Which server type Should you recommend?

- A. Synergy12000
- B. ML 350
- C. DL360
- D. Apollo 4200

**Correct Answer: C**

**Section:**

**Explanation:**

This is because the HPE ProLiant DL360 Gen10 server is a rack server that delivers security, agility and flexibility without compromise.It supports the Intel Xeon Scalable processor with up to a 60% performance gain and 27% increase in cores, along with 2933 MT/s HPE DDR4 SmartMemory supporting up to 3.0 TB with an increase in performance of up to 82%.1It also has a small footprint and can fit in a limited space.

**QUESTION 33**

Your customer needs help troubleshooting a Layer 3 network routing issue.  
Which command should you use?

- A. show LLDP neighbor-info
- B. traceroute
- C. snow startup-config
- D. config-router

**Correct Answer: B**

**Section:**

**Explanation:**

This is because the traceroute command is a network diagnostic tool that traces the route of packets across an IP network. It shows the path that packets take from the source device to the destination device and displays information such as the IP addresses of routers and switches along the path, the round-trip times of packets, and any packet loss or errors. It can help troubleshoot a Layer 3 network routing issue by identifying where the packets are dropped or delayed.

**QUESTION 34**

DRAG DROP

Match each HPE tool with its business value.

**Select and Place:**

Tool	Business Value
HPE Product Bulletin	Accurately size and efficiently deliver world-class solutions on HPE GreenLake Lighthouse, which powers HPE GreenLake Cloud Services and HPE infrastructure.
HPE CloudPhysics	Aides with the purchase, sale, and support of HPE solutions by providing technical overviews and specifications.
Solution Sales Enablement Tool	Provides curated information about HPE strategy and solutions as well as sales, marketing, and technical information aligned to specific solutions.
HPE Seismic	Provides data-driven insights to improve IT performance, ROI, and data protection through analysis of IT metadata.

**Correct Answer:**

## Tool

## Business Value

HPE Seismic		Accurately size and efficiently deliver world-class solutions on HPE GreenLake Lighthouse, which powers HPE GreenLake Cloud Services and HPE infrastructure.
HPE Product Bulletin		Aides with the purchase, sale, and support of HPE solutions by providing technical overviews and specifications.
Solution Sales Enablement Tool		Provides curated information about HPE strategy and solutions as well as sales, marketing, and technical information aligned to specific solutions.
HPE CloudPhysics		Provides data-driven insights to improve IT performance, ROI, and data protection through analysis of IT metadata.
